Shelter Equipment:

A number of shelter equipment have been provided to each shelter, which will be used at shelter level during disaster. The equipment include generator sets, inflatable tower lights & telescopic tower lights for night time disaster management, power saws, search and rescue equipment, First-Aid kit, free kitchen utensils, totaling more than 50 items.

- The CSMMC/ FSMMC will be duty bound to receive, keep in custody in good condition and maintain the shelter equipment supplied to the cyclone shelter by OSDMA and any other agency for search and rescue, first aid, free kitchen or any other purpose.
- The equipment will be put to emergency uses when such situation arises.
- The equipment received will be duly entered in the stock register maintained by the CSMMC/ FSMMC. Copies of the list of the equipment will be supplied to the concerned BDO and Collector.
- The equipment will be used for mock drill and for the purpose for which it is supplied in emergency situation.

Secretary of the CSMMC/ FSMMC will maintain a stock register and enter the equipment in the said register. The format is annexed herewith. The record of use of the equipment for maintenance or during mock drill and / or disasters should be maintained in the log book in given format to know the history of use of the equipment.

For safe use and maintenance of the shelter equipment, OSDMA has developed a separate manual in Odia. The instructions contained in the manual should be followed while using the equipment.
