MESSAGE

Disaster Management requires meticulous planning. District Disaster Management Plan (DDMP) is such a document which envisages the preparedness of District Administration with all its inventory of resources and capacity to tackle any eventuality in the district. The DDMP-2019 has been prepared in consultation with various departments and other stakeholders that will serve as a guiding document for timely and planned response to mitigate the damaging effect of any hazards systematically and scientifically.

Koraput District has experienced the Very Severe Cyclonic storm *'Hudhud'* during 2014 which was managed systematically with zero casualty in the district and the effect was minimised. Moreover, there is very possibility of flood and related health hazards during monsoon period. The updated plan will be helpful to strengthen the institutional mechanism of Disaster Management in the district.

The planning and preparedness initiatives taken as per the District Disaster Management Plan will be delivered at the disaster-prone areas in order to reduce the vulnerability and minimise the loss in case a disaster strike.

CEO, District Disaster Management
Authority, Koraput

FOREWORD

Koraput district is situated in the southern part of the state and is famous for its natural bounties, enriched with tribal tradition and culture. The habitants of this district depend upon the natural resources, agriculture and daily wage labourers to maintain their livelihoods. The district is vulnerable to various natural calamities like drought, flood, epidemic, heat stroke, boat capsize, lightning, drowning, fire accident, snakebite etc. All these have been a matter of great concern, which have added to the miseries of the people in this District.

District Disaster Management Plan (DDMP) 2019 is updated to identify threat and developed a defence mechanism to minimise the impact of any disaster in the District. The basic objective of this action plan is to ensure safety of the lives and properties of the people and domestic animals during the disasters. While formulating the District Disaster Management Plan, instructions of Special Relief Commissioner, MD, OSDMA, United Nations Development Programme (UNDP) and also valuable suggestions of Members of the District Natural Calamity Committee have been taken into consideration. The plan document has been categorized into two parts i.e. Volume-1 contains DDMP and Volume-2 contains all relevant statistical figures of the district, Maps &resource data base. The Plan deals with Risk Assessment and Vulnerability Analysis, Identification of Disaster-Prone Areas, Response Structures, Inventory of Resources, Standard Operating Procedures and Directory of Institutions & Key Individuals, etc. The Plan is prepared to help the District Administration to evacuate and protect the vulnerable people immediately at the time of any calamity strikes.

Meticulous planning is the first step to successful implementation. It is our sincere belief that with this District Disaster Management Plan 2019, disasters can be tackled in a more systematic & scientific approach providing relief to the affected persons through timely action in Koraput District.

Chapter- 1
INTRODUCTION

Under the DM Act 2005, it is mandatory on the part of District Disaster Management Authority (DDMA) to adopt a continuous and integrated process of planning, organizing, coordinating and implementing measures which are necessary and expedient for prevention as well as mitigation of disasters. These processes are to be incorporated in the developmental plans of the different departments and preparedness to meet the disaster and relief, rescue and rehabilitation thereafter, so as to minimize the loss to be suffered by the communities and are to be documented so that it is handy and accessible to the general public.

Section 31 of Disaster Management Act 2005 (DM Act) makes it mandatory to have a disaster management plan for every district. DDMP shall include Hazard Vulnerability Capacity and Risk Assessment (HVCRA), prevention, mitigation, preparedness measures, response plan and procedures.

Vulnerability of the Koraput District towards disasters, both natural and man- made is widely recognized. The district is vulnerable towards natural disasters like; floods, flash flood, cyclones, droughts, fire accidents, boat capsize landslide and the like. Losses caused by disasters continue to mount year after year. The need for an effective disaster management strategy to lessen disaster impact is being felt in many quarters and also for strengthening of organizational structure for disaster management. Along with, regular updating of Codes/Manual/Disaster Plans on the basis of experience gained and technological developments should be done.

It was felt that the generic categorization of disasters would help in preparing disaster management plan. This generic categorization of disasters is in no way intended to disturb handling of specific disasters by various departments. Precise actions, procedures and responsibilities have to be laid down well in advance in order to ensure timely response in case of any disaster. Therefore, a mechanism that takes into account multiple hazards and basic preparedness has to be articulated in the form of Quick Response Teams, Quick Assessment Teams, Reporting Procedures, Checklist and Handbooks. The mechanism also lays down crucial parameters, requirements and organizational composition of Emergency Operations Centers and Incident Command Systems.

The objective of the plan is to identify all common elements of response. This act as a base plan or a generic / modular plan for all response activities. It provides a frame work around which other agencies and departments can outline their own activities for disaster response. This plan will then be supplemented with specific disaster plan to take into account the peculiar conditions that might arise due to the specific disaster. However, these specific plans will have to be dealt with, in detail, in order to provide an account for all disaster in Koraput.Preparation and planning well in advance have been reflected throughout the plan. The checklist and handbooks that will make this plan operational have also been identified. Planning and preparation have been given a lot of importance, as it is better to be totally prepared rather than go unprepared and add to the chaos at a disaster site.

The District Disaster Management Plan (DDMP) has been envisaged as a preparedness plan whereby the receipt of a signal of an impending disaster would simultaneously energies and activates the mechanism for response and mitigation without loss of crucial time. This would be entailed all the participating managers to know in advance the task assigned to them and the manner of response. Identification of available resources including manpower, material, equipment and adequate delegation of financial and administrative powers are prerequisites to successful operation of the DDMP.

The DDMP is in essence, the Standard Operating Procedure (SOP) in which the implementation of efforts on ground is well laid down. Activities such as evacuation, search and rescue, temporary shelter, food, drinking water, clothing, health and sanitation are given prime importance. Communications accessibility and public information, that are important components of disaster management, would follow on the activation of the DDMP. These activities are common to all types of disasters and require subdivision and preparation of sub action plans by each specified authorities. Each sub group has been requested to work out the DDMP mechanism relevant to their group of disasters. The DDMP requires the disaster managers to;

- Evolve an effective signal/warning mechanism
- Identify activities and their levels
- Identify sub activities under each activity/level of activity
- Specify authorities for each level of activity and sub activity
- Determine the response time for each activity
- Workout individual plans of each specified authority to achieve activation as per the response time.
- Have quick response terms for each specified authority
- Have alternative plans and contingency measures
- Provide appropriate administrative and financial delegation to make the response mechanism functional viable
- Undergo preparedness drills.

Types of Disasters: (Experienced in Koraput District)

Common Natural Disasters	**Man Made/Accidental Disasters**
▪ Cyclone	▪ Fire Hazards
▪ Flood	▪ Communal Riot
▪ Flash Flood	▪ Accident – Road/ Railway
▪ Drought	▪ Strikes/ *Bandh*
▪ Land Slide	▪ Forest Fire
▪ Hail Storm/ Whirl Wind	▪ Boat Capsize
▪ lightning	▪ Snakebite

1.1 Aims and Objectives of the DDMP:

I. To identify the areas vulnerable to major types of the hazards in the district.
II. To adopt proactive measures at district level by all the govt. departments to prevent disaster and mitigate its effects.
III. To define and assign the different tasks and responsibilities to stakeholders during the pre-disaster and post-disaster phases of the disaster.
IV. To enhance disaster resilience of the people in the district by way of capacity building.
V. Reduce the loss of public and private property, especially critical facilities and infrastructure, through proper planning.
VI. Manage future development to mitigate the effect of natural hazards in the district.
VII. To develop the standardized mechanism to respond to disaster situation to manage the disaster efficiently.
VIII. To prepare a response plan based upon the guidelines issued in the State Disaster Management Plan so as to provide prompt relief, rescue and search support in the disaster affected areas.
IX. To adopt disaster resilient construction mechanism in the district by way of using Information, Education and Communication for making the community aware of the need of disaster resilient future development.
X. To make the use of media in disaster management.
XI. Rehabilitation plan of the affected people and reconstruction measures to be taken by different govt. departments at district level and local authority.

The District Disaster Management Plan (DDMP) is the guide for achieving the objective i.e. mitigation, preparedness, response and recovery. This Plan needs to be prepared to respond to disasters with sense of urgency in a planned way to minimize human, property and environmental loss.

1.2 Preparation and Approval of DDMP:

As defined in Section 30 of DM Act 2005, DDMA shall act as the district planning; coordinating and implementing body for disaster management and take all measures for the purpose of disaster management in the district in accordance with the guidelines laid down by the National Authority and the State Authority.

The district Collector will discuss the modalities and seek views for preparation of a holistic plan in the meeting of the DDMA held in the month of January and to prepare the plan by the end of February every year.

After finalisation the District Authority shall send a copy of the District DM plan to the State Disaster Management Authority for approval. The District Disaster Management Plan should be reviewed and updated annually. However, with the approval of the authority the plan may be updated whever required especially the emergency contact details and other changes if any.

1.3 Evolution of DDMP in brief: Evolution, Procedure and Methodology to be followed for preparation of DDMP

Updating D.D.M.P is a statutory mandate of Government as per the DM act, 2005. The following procedure was followed to update the DDMP, 2019.

- The Identification of all-important stakeholders who are directly or indirectly linked with various manmade and natural disasters was done.
- A workshop was organised by OSDMA in ROTI, Bhubaneswar for updating DDMP and IDRN portal of District where all the District Emergency Officers & DPOs were trained on updating of DDMP with all revenant facts and figures.
- After the training a team was formed consisting of DEO, DPO & Sr. Clerk of Emergency Sections at the district level for taking necessary steps as per the recommendation in the workshop.
- A meeting of DDMA was convened in the month of March 2019 where the DDMP template and roles and responsibilities of each stakeholder was shared and all the line departments were requested to submit the required information through official correspondence.
- A desk analysis was carried out at district level to find out the possible Hazards, vulnerability and risk in Koraput district.
- Plan preparation – writing and review and finalisation.

1.4 Stakeholders and their responsibilities

- At the District level, District Disaster Management Authority, with the District Collector designated as the Response Officer (RO), and other line departments at district HQ are responsible to deal with all phases of disaster management within district.

- Other technical institutions, community at large, local self-governments, NGOs etc. are also stakeholders of the District Disaster Management Plan.

- To educate the public on different flood and cyclone hazards and what protective steps should be taken
- To make arrangements for emergency action
- To effect evacuation from the flood affected Villages when necessary
- Rescue and Rehabilitation
- Post disaster action and review

The District Collector has the following duties:

i. To facilitate and coordinate with local Government bodies to ensure that pre and post disaster management activities in the district are carried out.

ii. To assist community training, awareness programmes and the installation of emergency facilities with the support of local administration, non-governmental organizations and the private sector.
iii. To function as a leader of the team and take appropriate actions to smoothen the response and relief activities to minimize the adverse impact of disaster.
iv. To recommend the Special Relief Commissioner and State Government for declaration of disaster.

Local Authorities have the following duties:

i. To provide assistance to the District Collector in disaster management activities.
ii. To ensure training of its officers and employees and maintenance of resources so as to be readily available for use, in the event of a disaster.
iii. To undertake capacity building measures and awareness and sensitization of the community
iv. To ensure that all construction projects under it conform to the standards and specifications laid down.
v. Each department of the Government in a district shall prepare a disaster management plan for the district. The local authorities need to ensure that relief, rehabilitation and reconstruction activities in the affected area, within the district, are carried out.
vi. Trust / Organisations managing Places of Worships & Congregation
    a. Each establishment / organisation identified as —critical infrastructure and key resource‖,
    b. Including places of congregation in a district shall prepare —on-site and off-site
    c. Disaster management plan. Carry out mitigation, response, relief, rehabilitation and
    d. Reconstruction activities.

Private Sector:

i. The private sector should be encouraged to ensure their active participation in the pre-disaster activities in alignment with the overall plan developed by the DDMA or the Collector.
ii. They should adhere to the relevant rules regarding prevention of disasters, as may be stipulated by relevant local authorities.
iii. As a part of CSR, undertake DRR projects in consultation with district collector for enhancing district‘s resilience.

Community Groups and Volunteer Agencies:

I. Local community groups and voluntary agencies including NGOs normally help in prevention and mitigation activities under the overall direction and supervision of the DDMA or the Collector.

II. They should be encouraged to participate in all training activities as may be organized and should familiarise themselves with their role in disaster management.

Citizens:

It is the duty of every citizen to assist the District Collector or such other person entrusted with or engaged in disaster management whenever demanded generally for the purpose of disaster management.

1.5 Plan for review and updating: Periodicity

- Dissemination of the plan.

-Revise and Maintain **-** Planning teams should establish a process for reviewing and revising the plan. Reviews should be a recurring activity. Review on an annual basis is considered minimum. It should be mandatory to consider reviewing and updating the plan after the following events:

i. A major incident.

ii. A change in operational resources (e.g., policy, personnel, organizational structures, Management processes, facilities, equipment).

iii. A formal update of planning guidance or standards.

iv. Major exercises.

v. A change in the district's demographics or hazard or threat profile.

vi. The enactment of new or amended laws or ordinances.

The responsibility for the coordination of the development and revision of the basic plan, annexes, appendices and implementing instructions must be assigned to the appropriate person(s) each year for review and update of the plan as per the suggestions of Authority.

It is recommended that a DDMP be internally reviewed on a yearly basis and either be updated or reaffirmed. The updates or reaffirmed document may also be used to summarize the accomplishments of the past year and help the administration to prioritize mitigation goals for the next year.

Chapter- 2
DISTRICT PROFILE

2.1 History & Location:

Koraput district located on the backdrop of green valleys contemplating immaculate freshness was established on 1st April 1936. Decorated by dense forests, waterfalls, terraced valleys and dating springs, the district is very much influenced by its rare gifts of nature which have attracted some aboriginal races like the Gadabas and Bondas and gives them shelter in its lap. The district is bounded by Rayagada in the east, Bastar district of Chhattisgarh in the west, Nabarangapur district in north and Srikakulam district of Andhra Pradesh and Malkangiri district in its south. The district of Koraput derives its name from its headquarters, the present town of Koraput. Koraput district was ruled by several dynasties such as Satavahans, Ikshvakus, Nalas, Ganga kings and kings of Suryavansha. It was a part of the erstwhile Madras presidency and became a district of Odisha state on 1st April 1936. In October, 1992, Koraput district was divided, resulting in the creation of Malkangiri, Rayagada and Nabarangpur districts.

In ancient time, the present district of Koraput was formed as a part of Atavika territory. The Mourya emperor Ashok conquered Kalinga in 261 B.C., but the land lying to the west of Kalinga could not be conquered by him. During the reign of Kharavela in the 1st century B.C. this territory was great source of strength for Kalinga as it was the recruiting ground for fighting forces. In 1958-59 the Dandakaranya Development Project came in to being to rehabilitate the displaced persons from East Pakistan and many areas in the district of Koraput which form the important part of the project, have since been reclaimed for the purpose. On 02.10.1992 district of Koraput was divided into four districts namely Koraput, Malkangiri, Rayagada and Nabarangapur vide Government of Odisha, notification No. DRC-36/92-49137/R dated 01.10.1992.Koraput is located in the southern part of Odisha, at $82^{0}5'$ to $83^{0}23'$E (Longitude) & $18^{0}13'$ to $19^{0}10'$N (Latitude), sharing its borders with Andhra Pradesh in the East and South (Viziyanagaram and Srikakulam district and Visakhapatnam and Viziyanagaram respectively and Malkangiri district of Odisha), Bastar district, Madhya Pradesh in the west, Nabarangpur and Kalahandi district in the North. The district Koraput was formed during 1936 after bifurcated from the erstwhile Madras Presidency with its headquarters at Koraput. The district is well known for its mountains and perennial streams and as it enjoys moderate and pleasant climate compared to other districts of Odisha.

The District is declared as a tribal area. The principal tribes are Poraja, Kondha, Gadaba, Bhumia and Bhatra. There are some minor tribes like the Bonda, Dhuria, etc. in the district.

2.2 Administrative Set up:

The Koraput District covers an area of 8807 sq km consisting total 13,79,647 population as per 2011 census. The District has got 2 sub divisions namely Koraput and Jeypore. There are total 14 Tahsils, 14 Blocks, three Municipalities, one NAC, 23 Police stations, 2028 Villages and 239 Gram Panchayats functioning in the District of Koraput.

2.3 Climate & Rainfall:

The climate of the district is mainly tropical in nature and it is effectively controlled by the South-Western monsoon and the retracting North-Eastern monsoon. The district being situated in the western fringe of Eastern Ghats, the climate of the district is more similar to that of the Deccan than that of the coastal plains. Koraput District enjoys an average rainfall of 1567 mm, during rainy season. Over the years, indiscriminate tree felling has resulted in deforestation and the climatic conditions are worsening, with drought being a major threat to its population. An erratic and declining rainfall has spurned the government to launch a watershed development programme in the district, which is aimed to give a boost to the agriculture sector.

The Average rainfall of the District during 2018 is 1793.98 mm against the Normal rainfall of the Dist i.e. 1567.20 mm. But the rainfall at Bandhugaon, Narayanapatna and Laxmipur blocks were below the normal rainfall. Analysis of last 9 years of rainfall concluded that the category of rainfall falls between deficient to normal. The table no. 3 gives a detail picture of the block wise rainfall of last 9 years.

2.4 Forest Cover in Koraput

Around 15 to 20% of Koraput land mass area is covered by forest area. Most of these forest areas are located in deep interiors of Koraput District, which obviously implies that their presence in and around Koraput city is very minimal and moderate. These forest areas lend as much natural beauty to this region as economic livelihood to local people. Especially highly unskilled tribal population residing in the interiors of district is dependent immensely on forest industry for their livelihood. As for which are main trees and plants found in forest area, then principal species commonly found are Timber, Fire wood and Minor forest produces like Tamarind, Hill Brooms and different types of Fibres and oil Seed. Besides, huge quantity of medical plants and shrubs are also found in Koraput's forest areas.

2.5 Land and Border areas

Koraput District has huge land area. The total area of Koraput District is 8,379 km, which makes it one of the biggest districts in Odisha state. The main city of Koraput and its adjoining towns make up for nearly 30% in this total land area. Geographically, the district of Koraput is located between 18 degree and 19 degree North Latitude and 82 degree and 83 degree East Longitude. Now coming to border areas of the district, it is surrounded by Rayagada and Srikaklam District (Andhra Pradesh) in the east, Bastar District (Chhatisgarh) in West, Nowarangpur District in North and Vijayanagaram and Visakhapatnam District (Andhra Pradesh) in South.

2.6 Geography

Surrounded by famous Eastern Ghats, geography of Koraput is mainly characterized by undulating terrains, which are dotted by lush green mountains, hilly areas, streams, waterfalls and plain land areas. Below you'll □nd more detailed information about geography of entire Koraput region, which includes information about its reservoir of minerals, soils and main rivers that flow through this region. Besides, detailed information about forest areas and lush greenery that cover huge land mass of Koraput region has also been included in below paragraph.

2.7 Topography

The famous Eastern Ghats with its hilly and mountainous areas obviously take up large part in this undulating terrain. Eastern Ghats mainly has presence in the border areas of the district, especially in the border areas near Bastar District in western parts and in border areas of Vishakhapatnam District located in southern part. Eastern Ghats has very moderate presence in and around the main city of Koraput but their influence on city's climatic condition is but obviously immense. When we are talking about Koraput's topography, then invariably mention of its innumerable beautiful waterfalls and streams is very natural. All these waterfalls and streams are actually extensions of or originate from many rivers and tributaries that pass through this district. Some of these waterfalls even draw tourists and locals in huge number and have in fact raised tourism prople of this district. The most prominent being Duduma Waterfalls, which is one of the highest waterfalls of India.

2.8 River and the Drainage System:

The Koraput district is having three major rivers i.e. Kolab, Indravati, Machkund over which Kolab reservoir, Muran dam & Jalaput reservoir existed. The Kolab Reservoir has upspring areas covering Semiliguda, Koraput, Lamtaput & Jeypore blocks with its downstream covering Jeypore, Borigumma, Kotpad, Boipariguda & Kundra blocks. The Indravati reservoir with its damsite project at Muran in Dasamantapur block stores the water and spills into the Indravati River. Similarly the Jalaput Dam project has its upspring area in Nandapur & Lamtaput block having the power project at Onkadeli and the downstream water flows into Saberi river. **(River Map enclosed in volume-II Page No. 244)**

2.9 Minerals Resources in Koraput

Koraput region does have substantial reservoir of minerals. Minerals, as we all know, play a very critical role in bolstering the economy of any region. This fact equally holds true for Koraput region as well. Its huge pile of minerals has already attracted huge investments. NALCO or National Aluminium Company Limited – one of the largest producers of aluminum in the world – operates huge plant in Koraput district. Besides, a huge cement plant has been operating in the district for many decades now. Now coming to most important detail, i.e. names of some the major and minor minerals found here. Some of the major minerals found here are Bauxite, Limestone and Granite. Other minerals like Quartz, Dolomite, Clay, Mica and Red Orcher are found in minor proportion here. Koraput regions geographical features, overall, makes up for engrossing detail. The famous Eastern Ghat coupled with innumerable beautiful waterfalls, couple of prominent rivers that pass through it and not to forget huge forest areas. All of these unique geographical features make this region one of the naturally beautiful and scenic places in Odisha state. In fact it would not be even wrong to say that today Koraput region is indebted to Mother Nature – not just for its scenic beauty and also economic viability.

Cyclone:

The impact is felt in mild form as the district is away from coast and full of hills and mountains. However the district is not altogether free from the risk of the grip of cyclone.

Fire Accidents:

Fire accidents present a serious problem to the houses in Koraput district. This is mostly due to the peculiar housing pattern adopted in the villages. These houses have generally mud-built walls with thatched roofs made out of timber, bamboo and straw. They spring up in clusters. Any occurrence of fire destroys houses and properties thereby causing serious damage to the affected people.

Drought:

Sometimes due to want of rain at the proper time either defers commencement of agricultural operations or affects growth of crops. Occurrence of drought is frequent in some part or the other in the district. Drought adds to the suffering of the people in the district.

Heat Stroke:

During summer months, severe heat wave causes dehydration and also serious threat to lives.

Earth Quake:

Though Koraput district has not experienced severe earthquake causing damage to lives or infrastructure, the possibility can never be ruled out as it can happen any time.

3.9.1 Industries Disaster Safety Mechanism of Koraput

Table- 29

Sl.	Block/ULBs	Mining		Safety Measures taken for possible Hazards
		Units	Persons Engaged	
1	Koraput Block	Panchpatmali Bauxite Mine(Central & North Block), Nalco	Departmental :543 Contractual: 635	1. Panchpatmali bauxite mine is certified under OHSAS-18001, an occupational health and safty management sysytem since 2005. Under this system, department wise hazards of all the significant risks associated with the hazards have been listed by a department HIRA (Hazard Identification and Risk Assessment) Team using a structured HIRA document. 2. Control measures of all identified significant risks like, OCPs (Operational control Procedures), SOPs and Work Instruction have been devised and implemented since 2005. 3. This system is audited by qualified Internal Auditors every four months, by certified External Auditors in every six months and recertification audit by external auditors in every three years. Recertification of the system is subject to satisfactory result of these audits. 4. Non-conformity of any requirement of the system is given in writing by all above stated auditors in a structured format of the system and these are complied in a time bound manner through preventive and corrective actions within the departments. 5. Apart from the above, all essential installations, each mining equipment, light and heavy motor vehicles, crushing & conveying plant etc. are provoded with the required safty features. Fire hydrants, fire extinguishers and fire tender have been provided as measure of fire protection/safety.

4.12 National Disaster Response Force (NDRF)

The Disaster Management Act 2005 has made the statutory provisions for the constitution of the National Disaster Response Force (NDRF) for the purpose of specialized response to natural and man-made disasters. The NDRF comprises of 12 units of Central Paramilitary Forces (CPMF) that includes 3 units each from Central Reserve Police Forces (CRPF) and Boarder Security Forces (BSF) and 2 Unit each from Central Industrial Security Forces (CISF), Indian Tibbet Boarder Police (ITBP) and Sahastra Seema Bal (SSB). Each battalion has 18 self-contained specialists Search and Rescue teams of 45 personnel. The NDRF team includes Chemical, Biological and Radiological Disaster (CBRN) emergency responders, S&A element, engineers, technicians, electricians, dog squads and paramedics. The NDRF battalions are strategically located at 8 different locations in the country based on the vulnerability profile to cut down response time for their deployment. During the threatening proactive deployment of NDRF is being carried out by NDMA in consultation with the State Governments.

4.13 Odisha Disaster Rapid Action Force (ODRAF)

The Government of Odisha formed Odisha Disaster Rapid Action Force (ODRAF) vide notification no.939/CD dated 07.06.2001. ODRAF is a multi-disciplinary, multi-skilled, high-tech force for all types of disasters. ODRAF aims at reducing casualties, clearance of communication channels, quick deployment of personnel and equipments and minimize expenditure and time lag and support institutional arrangement. In 3 phases, ten units of ODRAF have been set up. The ODRAF units are strategically located throughout Orissa. Locations of these units are identified on the basis of vulnerability profile to cut down the response time for their deployment. The ODRAF Units do not have any geographical /territorial restrictions in terms of area of operation.

10 new units of ODRAF have been proposed to set up at different locations like Sambalur, Boudh, Kalahandi, Nawarangpur, Gajapati, Berhampur, Puri, Khorda, Kendrapada and Jajpur

4.15 Emergency Communication System

4.15.1 State Emergency Operation Centre (SEOC)

The State Emergency Operation Centre has been made operational at Rajiv Bhawan, Bhubaneswar with state of art communication net-work. The State EOC functions round the clock throughout the year. The Organisation is headed by the Special Relief Commissioner (SRC) who exercises all administrative and financial powers. He is assisted by a group of experienced officers and staff. During any natural disaster, the office functions round the clock in an emergency mode.

Figure No. 5: Information flow chart from SEOC to Districts

4.15.2 District Emergency Operation Centers (DEOC)

The District Control Room under the control of District Collector will operate round the clock and will be the nerve centre to

I. Monitor
II. Co-ordinate
III. Implement the actions/activities for Disaster Management.

In a disaster time the District Control Room will operate under the central authority of the District Collector, exercising emergency power to issue directives to all departments to provide emergency response service. He/She will also co-ordination with the State Response Machinery like: State Relief Commissioner, Odisha, Bhubaneswar and Odisha State Disaster Mitigation Authority for appropriate support and smooth flow of information. The Control Room should be manned round the clock. The District Control Room is placed in the Emergency Section of the District Collectorate. The Key functions of DEOC are as mentioned below;

a. The District Emergency Operation Centre (DEOC) is to identify and ensure implementation of DRR into all developmental projects and schemes and ensure proper functioning of the resources present in the District every six months.
b. Based on the analysis, the DEOC has to procure/purchase/borrow resources from the concerned authorities and replace the dilapidated and non-functioning resources using the developmental funds.

c. Monitor that all the officers of the frontline departments are trained as per their requirement and also to ensure that all prevention, mitigation, preparedness and response measures are properly implemented within the district.
d. Convene meeting of District Disaster Management Authority in appropriate time
e. Prepare and update District Disaster Management Plan
f. Ensure running of Control room at District level and subordinate levels
g. Dissemination of weather and disaster warnings
h. Reporting on casualties, losses relating to disasters to higher quarters

The role of NGOs remains crucial in all phases of disaster management namely relief, response, rehabilitation, reconstruction, recovery, preparedness and mitigation. Recent trends with respect to management of natural disasters have highlighted the role of Non-Governmental Organisations (NGOs) as a vital stakeholder in the relief and response efforts especially with respect to facilitating communication and coordination between the administration and the affected community. NGOs have grass-root presence and strong linkages with the communities, and can readily respond to the needs of the affected community.

4.17 Role of Corporate Sector in the district relating to Disaster Management

Recognizing the importance of integrating the corporate sector and their nodal organizations in disaster prevention, mitigation and preparedness agenda, the National Disaster Management Framework drawn up by the Ministry of Home Affairs, Government of India envisages "involvement of corporate sector in awareness generation and disaster preparedness and mitigation planning" through sensitization, training and co-opting of the corporate sector and their nodal bodies in planning process and response mechanisms. Similarly, the GoI- UNDP Disaster Risk Management Programme also entails promotion of partnerships with the private sector in awareness generation and sensitization leading to development of disaster risk management plans. The recent major disasters have clearly indicated the need for interweaving of disaster risk reduction and management concerns in order to minimize the losses— both human and economic. This underscores the necessity of involvement of all stakeholders, from the Government, at all levels, to Community Based Organizations, international and national organizations, the community and, of course, the corporate sector.

In keeping with the paradigm shift in its approach to disaster management brought about by the Government of India and the recurring phenomenon of natural disasters impacting all sectors of socio-economic life, including the corporate sector, and inflicting heavy economic losses, focused attention has been given to risk mitigation endeavors to systematically reduce the vulnerabilities. The new approach stems from the premise that development in any sector, more so in the corporate world, cannot be sustainable and viable unless risk reduction and mitigation measures are built into the development processes and that investments in mitigation are much more cost-effective than expenditure on relief, rehabilitation and reconstruction. There are two major corporate houses in the District i.e. Hindustan Aeronautics Ltd and NALCO which have their CSR wings. The authority may take suitable action in coordination with these corporate houses for integration and collaboration for disaster preparedness and response in the district through exchange of technology, manpower and finance. The following actions are suggested to justify the role of corporate players in Disaster management in Koraput District.

1. Provision of some portion of the CSR fund for disaster management activities in the district for preparedness and capacity building activities as part of Disaster Management.
2. Organising/coordinating joint mock drill for both off-site and onsite emergency rescue and search operations to minimise the risk involved in various industrial hazards.
3. The banks functioning in the districts also having their CSR activities, which may be explored to mobilise fund of disaster management activities in the district through developing plan and proposals.
4. Various companies/corporate houses also can be reached for mobilising resources for strengthening disaster management activities in the district.

4.18 Public Private Partnership: Public & Private Emergency service facilities available in the district.

a. There are some of the NGOs are only involved in disaster management activities through community based risk reduction initiatives. The NGOs are Ekta, Dhan Foundation, SOVA & Pragati.

b. District Red Cross Society is functioning in the district in collaboration with the District Administration. The functions of DRCS in Koraput are;
    a. Awareness on various health related issue such as AIDS etc.
    b. Assistance to poor patients.
    c. Construction of Blood Bank in the district and providing human resources with equipments.
    d. Provides 2 no of ambulances to the DHQ Hospital for free public services.

Chapter- 5
PREVENTION & MITIGATION MEASURES

5.1 Disaster Risk Reduction

When disaster strikes, it creates severe impact on the development process and people are deprived of the outcomes of development. They lose their lives and livelihoods. Poor and marginalized sections of the society are further spiralled into an irreversible whirlpool of poverty. Development then becomes meaningless for those whom development is intended for. Over the years it has been observed that natural as well as human induced disasters create a lot of adverse impacts on the development process as the current development initiatives do not automatically reduce vulnerability of communities towards disasters. Development initiatives more often than not, do not consider disaster risks nor are disaster risk reduction concerns consciously built in the design and implementation of development programs. Occasionally communities have been left more vulnerable to disasters because, humanitarian or development initiatives have introduced new vulnerabilities or reinforced vulnerability into existing ones.
Disasters are the result of exposure of a community to a hazardous event (e.g. earthquake, flood, tropical cyclone, chemical leakage, etc.) and the vulnerability of the community towards this event. Disasters can be avoided or the negative effects minimised by ensuring disaster resilient development and building capacity. Disaster risk reduction (DRR) attempts to strengthen the capacity of the disaster-prone communities and address hazard threats through appropriate mitigation measures. Experiences in several countries have shown that by addressing the root causes of vulnerability, the impact of a disaster can be reduced.

DRR refers to the measures used to reduce direct, indirect and intangible disaster losses that may be technical, economic or social. „Mainstreaming DRR" describes processes that incorporate the concerns of disaster preparedness, prevention and mitigation into development and post disaster recovery policy and practices. It means completely institutionalizing DRR within the development and recovery agenda. Accordingly, the following broad objectives of mainstreaming DRR into Development will be encouraged:

- Ongoing schemes and projects of the Ministries and Departments of GoI and State Governments, as well as of all Government agencies and Institutions, including Public Sector Undertakings, will be audited by designated government agencies for ensuring that they have addressed the disaster risk and vulnerability profiles of the local areas where such schemes and activities are being undertaken.
- At conceptualization or funding stage itself, the developments schemes will be designed with consideration of any potential hazardous impact associated with it and incorporate measures for mitigation of the same.
- All the development schemes will be pragmatic, incorporating the awareness of local disaster risk and vulnerability, and ensuring that the schemes have

addressed these concerns and included specific provisions for mitigating such disaster concerns; and

- The DDMA will ensure that all the disaster relief and recovery programmes and projects that originate from or are funded by any agency satisfy developmental aims and reduce future disaster risks.

5.2 Structural Measures:

The following activities can be implemented by the concerned line departments keeping DRR & climate change adaptation into the limelight.

- Construction of multipurpose cyclone and flood shelters.
- Removal of hoardings before specified cyclone period
- Trimming of trees and shrubs and removal of damaged and decayed parts of trees close to localities and critical infrastructure
- Public safety norms and constructions in places of worship and mass gathering
- Soil erosion control and riverbank stabilization
- Road and Highway Stabilization
- Bridge abutment stabilization
- Protection of Roads, Culverts and Bridges against flood- grass plantation
- Repair and Maintenance of Embankments against flooding and erosion. Retrofitting of vulnerable spots to prevent embankment breaches
- Cross Drainage Works:- Construction of causeways and culverts sufficient for carrying water more than historical records to prevent flash floods in downstream villages
- Drinking Water:
    - Habitations to be covered under pipe water supply scheme
    - Water supply in scarcity areas in during summer season
    - Raising of hand pumps in flood prone areas
    - Repair/ Replacement of non-functional hand pumps
- Sanitation:
    - Community Mobilization
    - Construction of Toilets
    - Municipal Waste Management
    - Sewerage System in ULBs
- Plantation: River bank plantation, AR, ANR, Hill Slope Plantation, Fodder Plantation, Agro forestry etc.
- Soil conservation works.
- Water harvesting
- Prevention of Road Accidents:
    - Putting up of signage in accident prone zones
    - Light reflectors
    - Diversion boards for roads and bridges
    - Repair of potholes & construction of Speed breakers

Chapter- 6
CLIMATE CHANGE ADAPTATION & MITIGATION

6.1 Climate Change Adaptation & Mitigation

Weather and climate are the results of complex interactions between anthropogenic and natural factors. Evidence of global climate change include higher average temperatures, changes in precipitation, ocean warming, ocean acidification, sea level rise, decreasing sea ice, and changes in physical and biological systems. Observed climate change can be linked with the increase of green house gas concentrations in the atmosphere since the industrial revolution. Global surface temperature change for the end of the 21st century is likely to reach 4°C if no drastic mitigation actions are taken. Various sources of climate data exist that can support planning for climate change.

Greenhouse gases (GHGs) are trace gases in the atmosphere that absorb and emit long wave radiation. They naturally blanket the earth and keep it at about 33° C warmer than it would be without these gases in the atmosphere. The table features the seven most important greenhouse gases as regulated under the Kyoto Protocol. The seven gases each have a different capacity to trap heat in the atmosphere, or a so-called "*global warming potential*" (GWP). They all belong to the group of long-lived greenhouse gases (LLGHGs), because they are chemically stable and persist in the atmosphere over time scales of a decade to centuries or longer, so that their emission has a long-term influence on climate. Some of the GHGs occur naturally (e.g. CO_2, CH_4 and N_2O) but increases in their atmospheric concentrations over the last 250 years are due largely to human activities. Other greenhouse gases are entirely the result of human activities (e.g. HFCs, PFCs, SF_6 and NF_3).

Table : 6.1

Greenhouse Gas	Global Warming Potential (GWP) (over 100 years)	% of Total Anthropogenic GHG Emissions (2010)
Carbon dioxide (CO_2)	1	76%
Methane (CH_4)	25	16%
Nitrous oxide (N_2O)	298	6%
Hydrofluorocarbons (HFCs)	124-14,800	< 2%
Perfluorocarbons (PFCs)	7,390-12,200	< 2%
Sulphur hexafluoride (SF_6)	22,800	< 2%
Nitrogen trifluoride (NF_3)	17,200	< 2%

6.2 Important Greenhouse Gases: Carbon Dioxide (Co_2)

Most important greenhouse gas (contributes ~64% to total radiative forcing by long-lived GHGs). Half of CO_2 emitted by human activities is being absorbed in the

biosphere and in the oceans. Rest remains in the atmosphere for hundreds to thousands of years

The most important anthropogenic GHG is carbon dioxide (CO_2). It accounts for around 64% of total radiative forcing due to LLGHGs. Carbon dioxide does not have a specific lifetime because it is continuously cycled between the atmosphere, oceans and land biosphere and its net removal from the atmosphere involves a range of processes with different time scales. CO_2 is primarily emitted as a result of burning of fossil fuels, deforestation and forest degradation and iron and steel production. Oceans and forests are the main sequesters of carbon i.e. sinks that can absorb CO_2 from the atmosphere. Carbon dioxide is the gas to which all other gases are compared when speaking of Global Warming Potential. Emissions of other greenhouse gases can be converted into *CO_2 equivalent emissions*.

Table : 6.2

Sl No	Name of the Industry/Plant/Firm	Location	Quantity of Co2 emission (PPM)	Ranking as per CO2 Emission (in the district)	Other major polluants emited (PPM)	Action taken for cutting down émission

6.3 Important Greenhouse Gases: Methane (CH4)

Second most significant greenhouse gas (contributes ~18% to total radiative forcing by long-lived GHGs). Approximately 40% of methane is emitted into the atmosphere by natural sources. About 60% comes from human activities & Stays in the atmosphere for approximately 12 years.

The second most significant anthropogenic GHG is methane (CH_4) which contributes to approximately 18% of total radiative forcing due to LLGHGs. Approximately 40% of methane is emitted into the atmosphere by natural sources (e.g. wetlands and termites). About 60% comes from human activities (e.g. cattle breeding, rice agriculture, fossil fuel exploitation, landfills and biomass burning). Methane is mostly removed from the atmosphere by chemical reactions, persisting for about 12 years. Thus although methane is an important greenhouse gas, its effect is relatively short-lived.

Table : 6.3

Sl No	Name of the Block	Major Sources	Annual émission (In PPM)	Ranking as per CH4 Emission (PPM)	Action taken for cutting down émission

6.4 Important Greenhouse Gases: Nitrous Oxide(N2O)

The third most significant greenhouse gas (contributes ~6% to total radiative forcing by long-lived GHGs). Stays in the atmosphere for approximately 114 years. Nitrous oxide is emitted into the atmosphere from both natural (about 60%) and anthropogenic sources (approximately 40%).

Nitrous oxide is the third most significant GHG, contributing to about 6% of radiative forcing due to LLGHGs. The primary human sources of N_20 are fertilizer production and use in agriculture and various industrial processes. It is estimated that N_20 stays in the atmosphere for an estimated 114 years. Its impact on climate, over a 100-year period, is 298 times greater than equal emissions of carbon dioxide. It also plays an important role in the destruction of the stratospheric ozone layer which protects us from the harmful ultraviolet rays of the sun.

Table : 6.4

Sl No	Name of the Block	Fertiliser /Industrial processes	Annual Usage (In tonnes)	Ranking as per N2O Emission (PPM)	Other major polluants emited (PPM)	Action taken for cutting down émission

6.5 Important Greenhouse Gases: Fluorinated Gases

Global warming effect up to 23,000 times greater than carbon dioxide. Stay in the atmosphere up to 50,000 years. Three main groups: hydrofluorocarbons (HFCs), perfluorocarbons (PFCs), and sulfur hexafluoride (SF_6). Mainly developed as substitutes for ozone-depleting substances

Fluorinated gases are a family of man-made gases used in a range of industrial applications. Sources include refrigerants, air-conditioning, solvents, aluminium and magnesium production, etc. Many fluorinated gases have very high global warming potentials (GWPs) relative to other greenhouse gases. That means small atmospheric concentrations can have large effects on global temperatures. They can also have long atmospheric lifetimes, in some cases, lasting thousands of years. Fluorinated gases are removed from the atmosphere only when they are destroyed by sunlight in the far upper atmosphere. In general, fluorinated gases are the most potent and longest lasting type of greenhouse gases emitted by human activities. There are three main categories of fluorinated gases: hydrofluorocarbons (HFCs), perfluorocarbons (PFCs), and sulfur hexafluoride (SF_6).

- Hydrofluorocarbons (HFCs) are the most common group of *F-gases*. They are used in various sectors and applications, such as refrigerants in refrigeration,

air-conditioning and heat pump equipment; as blowing agents for foams; as solvents; and in fire extinguishers and aerosol sprays.

- Perfluorocarbons (PFCs) are typically used in the electronics sector (for example for plasma cleaning of silicon wafers) as well as in the cosmetic and pharmaceutical industry. In the past PFCs were also used in fire extinguishers and can still be found in older fire protection systems.
- Sulphur hexafluoride (SF_6) is used mainly as an insulating gas, in high voltage switchgear and in the production of magnesium and aluminium.

6.6 Important Green House Gases: chlorofluorocarbons (CFCs)

Chlorofluorocarbons (CFCs) an important Green House Gas contribute about 12% to radiative forcing by long-lived GHGs has not been included in the Kyoto Protocol because they are already regulated under the Montreal Protocol on Substances that Deplete the Ozone Layer which entered into force in 1989. The Montreal Protocol includes, for example, chlorofluorocarbons (CFCs) which contribute about 12% to total radiative forcing by LLGHGs. CFCs can stay in the atmosphere for more than 1,000 years. CFCs have a global warming potential (GWP) that ranges between 4,750 and 14,400 (over 100 years time span). CFCs are used in the manufacture of aerosol sprays, blowing agents for foams and packing materials, as solvents, and as refrigerants.

6.7 Green House Gas Sequestration

In order to prevent dangerous anthropogenic interference with the climate system, actions need to be taken to stabilize greenhouse gas concentrations in the atmosphere. Such actions are referred to as “climate change mitigation”. More specifically, climate Change mitigation involves:

- reducing GHG emissions, e.g. by making older equipment more energy efficient;
- preventing new GHG emissions to be released in the atmosphere, e.g. by avoiding the construction of new emission-intensive factories;
- preserving and enhancing sinks and reservoirs of GHGs, e.g. by protecting natural carbon sinks like forests and oceans, or creating new sinks ("carbon sequestration").

The global community has committed itself to hold warming below 2°C (compared to pre-industrial temperatures) to prevent dangerous climate change. The 2013 IPCC report on the physical science basis of climate change provides a "budget approach" to this goal, looking at total allowable CO_2 emissions level to meet the 2°C target. The report states that in order to have a greater than two in three chance of keeping *global warming* below 2°C, cumulative emissions of CO_2 cannot exceed 1,000 Gigatonnes of carbon (GtC). As of 2011, more than half this amount, or over 500 GtC, has already been emitted since 1861-1880. When the effects of other greenhouse gases are included, even less CO_2 could be emitted to keep below a 2°C warming.

Current annual emission levels are at 9.5 GtC and are likely to grow every year due to population growth and economic development patterns. If annual emissions continue to grow as in past years ("business as usual" scenario) the carbon budget will be exhausted in the next three decades.

6.8 Sectors with High Mitigation Potential (Table : 6.9)

Sl No	Sectors	Mitigation Options
1	Energy	• Use of renewable heat and power (hydropower, solar, wind, geothermal and bio-energy) • Improved supply and distribution efficiency • Carbon capture storage (CCS) • Combined heat and power
2	Transport	• More fuel efficient vehicles • Use of alternative energy sources (biofuels, cleaner diesel, etc.) • Better land-use and transport planning • Shift from individual transport to public transport systems • More efficient driving practices • Non-motorized transport (cycling, walking)
3	Industry	• Process-specific technologies that improve efficiency and reduce emissions • Material recycling and substitution • Heat and power recovery/cogeneration • Control of greenhouse gas emissions
4	Agriculture	• Manure and livestock management to reduce CH_4 emissions • Improved fertilizer application techniques to reduce N_2O emissions • Improved crop and grazing land management to increase soil carbon storage • Restoration of cultivated peaty soils and degraded lands

		• Agro-forestry practices
5	Forestry	• Reduced deforestation • Afforestation/reforestation • Forest management • Tree species improvement to increase biomass productivity and carbon sequestration
6	Waste	• Landfill methane recovery • Waste incineration with energy recovery • Composting of organic waste • Controlled wastewater treatment • Recycling and waste minimization • Biocovers and biofilters to optimize CH_4 oxidation

Chapter- 7
SAFETY OF SCHOOLS AND CHILD CARE INSTITUTIONS

Implementation of School Safety Policy Guidelines 2016 *(SSP-2016 Guidelines)*

7.1 Order on WP(C) 483/2004 of Hon'ble Supreme Court

The Hon'ble Supreme Court vide orders of dated 14.08.2017 in WP (C) 483/2004, directs vide letter no 2437/2004/SC/PIL/(WRIT) dt. 23.08.2017 that the School Safety Policy (SSP) 2016 guidelines issued by NDMA are statutory in nature and shall be implemented in letter and spirit by all concerned authorities for all schools. The direction of the Supreme Court in Implementation of the School Safety Policy Guidelines Inter-alia postulates as follow:

- Time bound implementation of the Guidelines
- District Disaster Management Authority to ensure and monitor compliance of the said Guidelines
- District Education Officer of each District to be a "Nodal officer" with responsibility, liability and obligation as well as powers and functions to ensure strict compliance with the Guidelines within the district of his jurisdiction.
- Joint Monitoring Committee consisting of representations of both Department of School Education & Literacy, Ministry of HRD and NDMA
- Quarterly compliance reports from the Chief Secretary to MHRD and NDMA on the actions taken.

Hon'ble Supreme Court has also defined few actions at different levels to ensure school safety

State & District Level	**School Level:**
• Policy for safety audits in all schools • 'Stability certificate' by Government-certified engineer. • Manual for fire safety procedures and other safety precautions • The National Building Code of India, 2005, to construct fire-safe buildings. (Revised 2016)	• Schools must take appropriate safety measures and an emergency response plan that delineates staff responsibilities, communication modes, and training and updating procedures for all members of the faculty, staff and students. • Fire insurance coverage should be made mandatory for all schools. • Ensuring that the kitchen in the precincts of the school has adequate safety mechanisms.

Ref. : Fire Safety Measures in School s(Section 3.1 p-23) / Training of School Teachers & Other Staff (Section 3.1 p-25) /School Building Specifications (Section 3.1 p-27) Clearance & Certificates (Section 3.1 p-29) SC. ***Judgement on WP(C) 483/2004***

7.2 Guidelines on School Safety Policy, 2016- NDMA

The School Safety encompasses "the creation of safe environments for children starting from their homes to their schools and back." This as well includes safety from large-scale natural hazards, human made risks, pandemics, violence as well as more frequent and smaller-scale fires, transportation and other related emergencies and environmental threats that can adversely affect the lives of children.

Vision :

- The Guidelines stand for a vision of India where all children and their teachers, and other stakeholders in the school community are safe from any kind of preventable risks that may threaten their well being during the pursuit of education.
- Educational continuity is maintained/ resumed even in the immediate aftermath of a disaster so that Children are physically, mentally and emotionally secure within their schools.

Approach and Objectives

- All hazard approach.
- All schools; all stakeholders 2. Strengthening existing policy provisions to make schools safer
- School Safety as an indicator of quality for continued planning, execution and monitoring
- Primary objective is to ensure the creation of safe learning environment for children.
- Also seek to highlight specific actions towards school safety that can be undertaken by different stakeholders within the existing framework of delivery of education.

Applicability

- The National School Safety Policy Guidelines apply to all schools in the country- whether government, aided or private, irrespective of their location in rural or urban areas.
- They apply to all stakeholders involved in delivery of education to Children in India

All hazard approach

- School Safety efforts needs to take cognizance of all kinds of hazards that may affect the wellbeing of children.
- Hazards include structural and non-structural factors.
- Structural factors include dilapidated buildings, poorly designed structures, faulty construction, poorly maintained infrastructure, loose building elements, etc.
- Non Structural factors include loosely placed heavy objects such as almirahs, infestation of the campus by snakes and any other pests, broken or no boundary walls, uneven flooring, blocked evacuation routes, poorly designed and placed furniture that may cause accidents and injury, inadequate sanitation facilities, etc.

Right to Education Act 2009

- The Act sets minimum norms and standards with regard to location and quality of schools and in Clause 19, lays down that no school shall be established, or recognized unless it fulfills the norms and standards specified in the schedule.

- One of the key standards is in relation to access to “all weather buildings”; in “areas with difficult terrain, risk of landslides, floods, lack of roads and in general, danger for young children in the approach…
- the State Government / Local Authority shall locate the school in such a manner as to avoid such dangers”.
- The Act lays down the formation of the School Management Committee for planning of infrastructure and other requirements with respect to operational functioning of schools.
- The School Development Plan, as laid out by the Act, spells out the physical requirements of additional infrastructure and equipments to meet the norms spelt out in the schedule (in relation to all weather buildings).

Key Action Areas

1. **Institutional strengthening at the State & District levels**
   - Co-opting senior officials of the Department of Education in SDMA and DDMA.
   - Nomination of School Safety Focal Point Teacher & Sensitization of School Management Committee on DM.
2. **Planning for Safety**
   - Structural Measures (including siting, design and detailing for structural safety).
   - Non structural Measures.
   - Preparation & implementation of School Disaster Management Plan.
   - Leveraging existing flagship programmes to make school campus safer.
3. **Capacity building for safe schools**
   - Training for students and school staff
   - Specialized training and skill building of Education officers, representatives of SCERT and DIET, SDMA, DDMA, etc on school safety
   - Mock Drills
4. **Disaster Management in Core Curriculum**
5. **Regular monitoring of risk and revision of School Safety Plans (including Safety Audits & Availability of Emergency Equipment).**

Chapter- 8
CAPACITY BUILDING MEASURES

8.1 Approach

Developing a DDMP without building capacity or raising awareness amongst stake- holders can be detrimental to the development of a successful and sustainable plan. Stakeholders and communities are critical components to a successful, long-term, sustainable disaster management plan. Capacity Building develops and strengthens skills, competencies and abilities of both Government and non–government officials and communities to achieve their desired results during and after disasters, as well as preventing hazardous events from becoming disasters. Developing institutional capacity is very important. At the same time, by making the local community part of the process and solution would help in ensuring that disaster mitigation measures are more likely to be implemented and maintained over time.

8.2 Capacity Building of Govt. Officials, PRI Members etc.:

Districts to first utilize the funds available under different schemes at the district level, for capacity building activities. Besides, funds are also available under State Disaster Response Fund (SDRF). District Administration to prepare the Capacity Building plan for the district and send the same with detailed budget to SDMA for necessary funding.

Indicative list of training programmes is given below.

Table No. 55

8.6 Community Capacity Building and Community Based Disaster Management:

Under the provisions of Disaster Management Act, 2005 DM Institutions/authorities like National Disaster Management Authority (NDMA), National Executive Committee (NEC) at the national level; State Disaster Management Authority (SDMA), State Executive Committee (SEC) at the state level; and District Disaster Management Authority (DDMA) at the district level have come into force. The Act does not per se define communities or community based disaster management as a process. However, there are several references made to communities, NGOs, community involvement, community training and capacity building of community in various provisions of the Act, Policies & Guidelines of the State & Central Govt.

- The DM Act 2005 mandates strong association of the community and civil society with the process through well-thought strategies of awareness generation, capacity building and training.
- The National Disaster Management Policy, formulated in 2009 by the National Disaster Management Authority recognizes community as the first responder to disaster and hence includes the Community Based Disaster Preparedness.
- The 8th Agenda of the "Prime Minister's 10 Point Agenda" postulates to "Build on local capacity and initiative"

The State Executive Committee (SEC) in its meeting held on 05-01-2017 has been approved for preparation of VDMPs for Community Based Disaster Management (CBDM) in the disaster prone villages. The Village Disaster Management Committee (VDMC) and Task Forces at village level are to be formed and capacitate them to work for disaster management equipped with preparedness to minimise the loss of life and property of the target community. Processes of VDMP are guided by principle of equity, heterogeneity and public accountability. The different stages in CBDRM are disaster / vulnerability risk assessment, risk reduction planning for mitigation and preparedness, early warning systems, post disaster relief and participatory monitoring and evaluation.

As many as 250 nos. of vulnerable villages will be taken up in the first phase of Community Based Disaster Management (CBDM) through preparation of Village Disaster Management Plan during the year 2019. Subsequently, 207 nos. of more vulnerable villages have been proposed for VDMP during the year. The details given below;

Chapter- 9
PREPAREDNESS

Preparedness Plan is made to place systems and protocols in place to lead a coordinated response to disasters that are effective and efficient with the available resources. The plan identifies the stakeholders to be involved in the response, protocols for the involvement of external agencies, Roles and Responsibilities for the Response Mechanism and for providing training programs to the local administration and communities to build their understanding on how to respond better. In a preliminary plan, even though the details of a disaster remain uncertain, you can identify emergency shelter sites, plan and public evacuation routes, identify emergency water sources, determine chains of command and communication procedures, train response personnel and educate people about what to do in case of an emergency. All of these measures will go a long way to improving the quality, timing and effectiveness of the response to a disaster. The actual planning process is preliminary in nature and is performed in a state of uncertainty until an actual emergency or disaster occurs. The aim of preparedness planning is to identify assignments and specific activities covering organisational and technical issues to ensure that response systems function successfully in the event of a disaster. The ultimate objective is not to write a plan but to stimulate on-going interaction between parties, which may result in written, usable agreements.

9.1 Overview of preparedness planning

Disaster preparedness planning involves identifying organisational resources, determining roles and responsibilities, developing policies and procedures and planning activities in order to reach a level of preparedness to be able to respond timely and effectively to a disaster should one occur. The actual planning process is preliminary in nature and is performed in a state of uncertainty until an actual emergency or disaster occurs. After a disaster occurs, plans must be adapted to the actual situation.

9.2 The need for preparedness planning

The concept of preparedness planning is very important for those involved in disaster management. During an actual emergency, quick and effective action is required; however, this action often depends on having plans in place before a disaster strikes. If appropriate action is not taken or if the response is delayed, lives will be needlessly lost.

9.3 District Emergency Operation Centre (DEOC)

The District Emergency Operation Centre, Koraput is functional at all hours. It is intended to monitor, coordinate and implement the actions/activities for Disaster Management during any disaster or emergency situation in the district. It receives early warnings and all messages/instructions from the state control room and passes them on to the officer in-charge, who, if required, directs them further to sub-divisions and tahsils. The control

rooms at the sub divisional, tahsil headquarters receive all information regarding emergency situation in their respective areas and also convey any information pertaining to relief operations from the central control room. They also issue directions regarding evacuation and supply of relief and all other precautionary measures according to situation prevailing in their respective areas.

9.4 Preparedness measures for DEOC:

Installation of Warning System

District Control Room to have a track on daily weather forecast have been provided with the facility of Internet. Through direct access through IMD and some other websites can obtain the forecast report. The lists of Website through which the DCR can access the weather report are as follows:

www.imd.ernet.in, Indian Meteorological Deptt.
www.ndmindia.nic.in, National Disaster Management, GOI
www.Odishawater.com, Water Resource Department
www.osdma.org, Odisha State Disaster Mitigation Authority
www.Odishagov.nic.in Govt. of Odisha
www.cnn.com/weather, CNN
www.hurricanealley.net, Information about tropical Cyclones
www.usgs.gov, U.S Geological Survey service
www.disasternews.net, Disaster Related News service

9.5 DEOC Operation

Following the important Three C's i.e. **Command, Control and Communication** for effective response in an emergency, we will be able to minimize the hardships of the community and improve the quality of the process of recovery. DEOC room will be able to provide timely, supported and well thought –of interventions to the grass root staff as well as volunteers as it will be the hub of three C's. In a disaster time the District Control Room, Koraput will operate under the central authority of the District Collector exercising emergency power to issue directives to all departments to provide emergency response service. He will also co-ordination with the State Response Machinery like: State Relief Commissioner, Odisha, Bhubaneswar and Odisha State Disaster Mitigation Authority for appropriate support and smooth flow of information. The Control Room should be manned round the clock.

9.6 Location of DEOC

The EOC will be set up at a suitable location and the building must be disaster resistant made by following Building Code norms strictly so as to withstand the impact of disasters, particularly earthquakes, and remain functional during the emergency phase. The EOCs/Control Rooms already in existence will have to be suitably upgraded.

9.7 Communication Network of EOCs

The EOC must be provided with a fail proof communication network with triple redundancy of NICNET of NIC, POLNET of Police and SPACENET of ISRO in addition to the terrestrial and satellite based communication to ensure voice, data and video transfer.

The DEOC has to be connected with the Odisha State EOC that will function on 24*7 basis right through the year. The DEOC is required to communicate with EOC, NDRF and MEOC (at disaster site).

9.8 Applications at the DEOC

A range of modules are under development for systemic management of data and information at pre, during and post disaster situations. District Disaster Management Authority, Koraput will need to get in touch with NDMA through OSDMA for setting up of these applications. These systems will become available for use in due course.

Pre-disaster Systems

I. Administrative Unit Module
II. Disaster Risk & Vulnerability Module
III. Directory Information module
IV. Resource (Contingency Plan) module
V. Forecasting, Warning, Simulation Module

During-disaster System

I. Alert Messaging module
II. Incident Reporting module
III. Rescue operations module
IV. Relief operations module
V. Relief Management Module

 Damage Assessment & Fund Allocation System

Post-disaster Systems

I. Restoration & Rehabilitation monitoring System
II. Damage Analysis System
III. Feedback and Control module

9.9 Steps for Preparedness Plan

The preparation of a Disaster Preparedness Plan involves the following steps:

Table No. 63

Steps	What is to be done	Who are to be involved	How it is to be done
I	Review and Analysis	District Collector, ADM, Emergency Officer, BDOs, Gram Panchayat, Village community, NGOs/CBOs, Community/Village	Past history of disasters to be discussed and documented Extent of severity and damage to be recorded The nature of the Warning issued to be analyzed The nature and extent of the rescue and restoration done, to be reexamined

		level workers	
II	Situation Analysis	Sub-Collector, BDOs, Line Deptts, Gram Panachayat ,Village community, NGOs/CBOs, Community/Village level workers	Mapping the geography and topography of the risk prone areas, block-wise, GP-wise and village-wise Demographic details to be recorded Mapping of the habitation in the concerned areas The natural resources to be marked on the maps Listing all the livelihoods and properties The existing risk prone/ safe infrastructure to be marked on the map
III	Hazard Analysis	Sub-Collector, BDOs, Line Deptts, Gram Panachayat ,Village community, NGOs/CBOs, Community/Village level workers	Identification of all possible hazards in the area based on past experience and available records Identification of the most vulnerable areas with relation to threat to life, livelihoods and property
IV	Vulnerability Assessment	Sub-Collector, BDOs, Line Deptts, Gram Panachayat ,Village community, NGOs/CBOs, Community/ Village level workers	Locations of the vulnerable areas are to be mapped separately Identification of the vulnerable people such as, the elderly, the disabled, children and pregnant women, families living in thatched houses, fishermen (if any), ailing people, etc. Identification of property or assets which are likely to be affected, such as, cattle and other livestock's, kachcha houses, weak structures, pump sets, tube wells and other installations, crops, horticulture and plantations, boats, nets, etc. Identification of weak points on embankments Marking the drainage system in the concerned area

9.13 Procedure for Using Inmarsat Isat Phone 2

1. Stand outside with a clear view to the sky with the phone antenna pointing upwards.
2. There must be a clear line of sight between the phone's antenna and the satellite.
3. Point the antenna towards **South-East** direction.
4. Switch on the phone by pressing the Red power button of the phone for few seconds. Until the screen lights up.
5. Align the antenna for getting the maximum satellite signal strength (minimum two bars)

6. The screen will show "searching for satellite" "registering with network".
7. The screen will show "ready for service". Inmarsat name will come in top right corner.
8. Then the phone is ready to operate
9. Simply dial the desired no:

9.17 I.D.R.N. (India Disaster Resource Network) :

It is a web based information system for managing the inventory of "Equipment, Skilled human resources and Critical Supplies" for emergency response. It is initiated by Ministry of Home Affairs (MHA), Government of India, who has been managing the IDRN portal since June, 2008. The District Authorities are authorized for uploading and updating the data after collecting it from various line departments of their respective districts. The information available in I.D.R.N. portal can be effectively put to use at the time of emergency relating to various calamities/ exigencies.

A table containing availability of some important equipments and supplies is provided in DDMP Volume-II Chapter No. 6 Page No. 269-329.

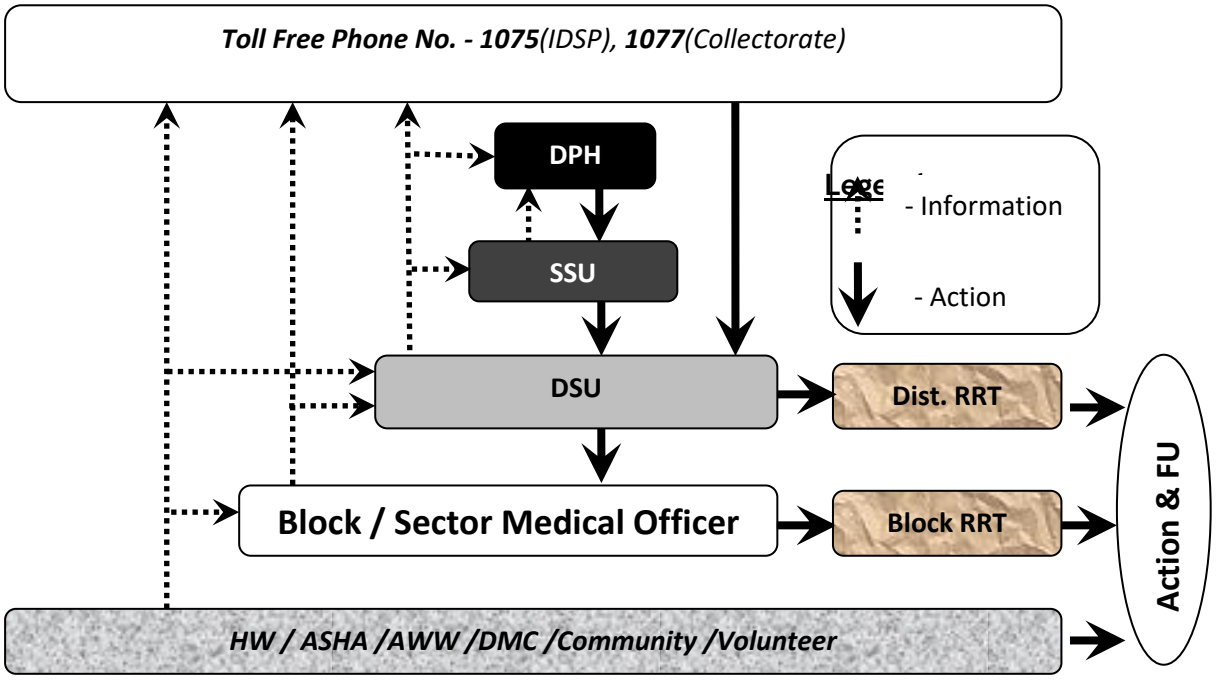

9.18 Preparedness for Health Related Hazards:

Taking into consideration of past experience, an action plan is prepared in Koraput District for the year 2019-20 to meet the Flood/Natural Calamity / epidemic / outbreak situation. The Health Staff of this district are instructed to remain alert and make necessary arrangements to meet the emergency situation as and when required. Necessary preventive health measures are being taken up well in advance to complete the arrangements before the onset of monsoon. Continued I.E.C activities are being conducted in all the blocks up to village level especially in the vulnerable and epidemic prone areas through Health Staff and all other functionaries as deemed proper. IEC through Folk Media will be planned in collaboration with NHM & District Cultural Society. All Programme Officers who are going to the field shall review and report the steps undertaken at each level regarding preparedness and action on following points:-

1. Connectivity and any chance of disruption of Road.
2. Stock Position and availability of Drugs (Partially ORS/IV Fluid/ASV).
3. Water sources and disinfection.
4. Mobilization of Staff and vehicle as per Micro Plan.
5. Any event attracting intervention
6. Preparedness of Block RRT

Daily Epidemic Report must be submitted by MO I/C to the District level through E-mail/Phone etc. to IDSP Cell. Even "Nil" Attack Report must be submitted to Ph No-252061 by 3.00 PM. Besides this any prediction or start of natural calamity/outbreak has to be reported along with from June to October.

9.18.3 Standard Operating Procedure (SOP) for Blocks:

- List of villages without safe drinking water is with the blocks. Please take care of the area and also collect the TW/sanitary well status from RWSS JE of the block
- The SEMs are already sensitized on disinfection and maintenance of TWs. Take the advantage of that and ask the ASHA/AWWs to inform them about any problem of the TWs to them before communicating to the CHC.
- Daily reporting of institutional surveillance on ADD & any other abnormal situation/disease, be sent proactively over phone without waiting for call from District (the pharmacist/ SI head quarter should be responsible for collection, compilation & transmission).
- On the event of outbreaks these formats are sent by mail on daily basis.
- First hand information on action taken has to be communicated with the FIR.
- Use the simplified standard reporting format sent, for outbreaks
- The CUG phones should be actively used for communication instead of switching off or non-response.
- Mostly weekly reports are irregular, even defaulted. Avoid such things
- Surveillance and Health intelligence network must be of highest level to pick up every case at the earliest before the information reaches the District through others/media.
- Quick response/compliance be made to media scan under intimation to all up in the information network instead taking it as a rumor/false news.
- Proper documentation & record keeping has to be maintained at all levels from sub-center to the block.
- The preparedness plan with mapping has been received from few Blocks others to submit soon & follow the preparedness plan meticulously. Especially the sector officers to update the CHC every afternoon before the daily report are transmitted to the District.
- Hope by this time medicines and logistics have reached the sub-centers, PHC & MRCs as per requirement and some body is made responsible for each unit. If needed please indent.
- The Block RRT must be always alert & the control room should be in touch with the RRT & District Heat Quarter. Please do not hesitate to take assistance of the District RRT.
- The standard formats by the state needs to be filled and used, irrespective of use of any locally developed formats, for record keeping & reporting.

9.18.4 Medicines & Disinfectants:

The Medical Officer of each CHC/PHC is required to receive the common medicines like O.R.S packets, Tetracycline Caps/I.V. Fluids etc. and disinfectants like bleaching powder, phenyl etc. from Asst. Dist Medical Officer, (PH) Koraput as per the requirement by deputing their staff. The Medicines will be sent well in advance before rainy season and it will be kept in suitable places especially in un-approachable areas where it can be used without delay at the time of need.

Chapter- 10
RESPONSE

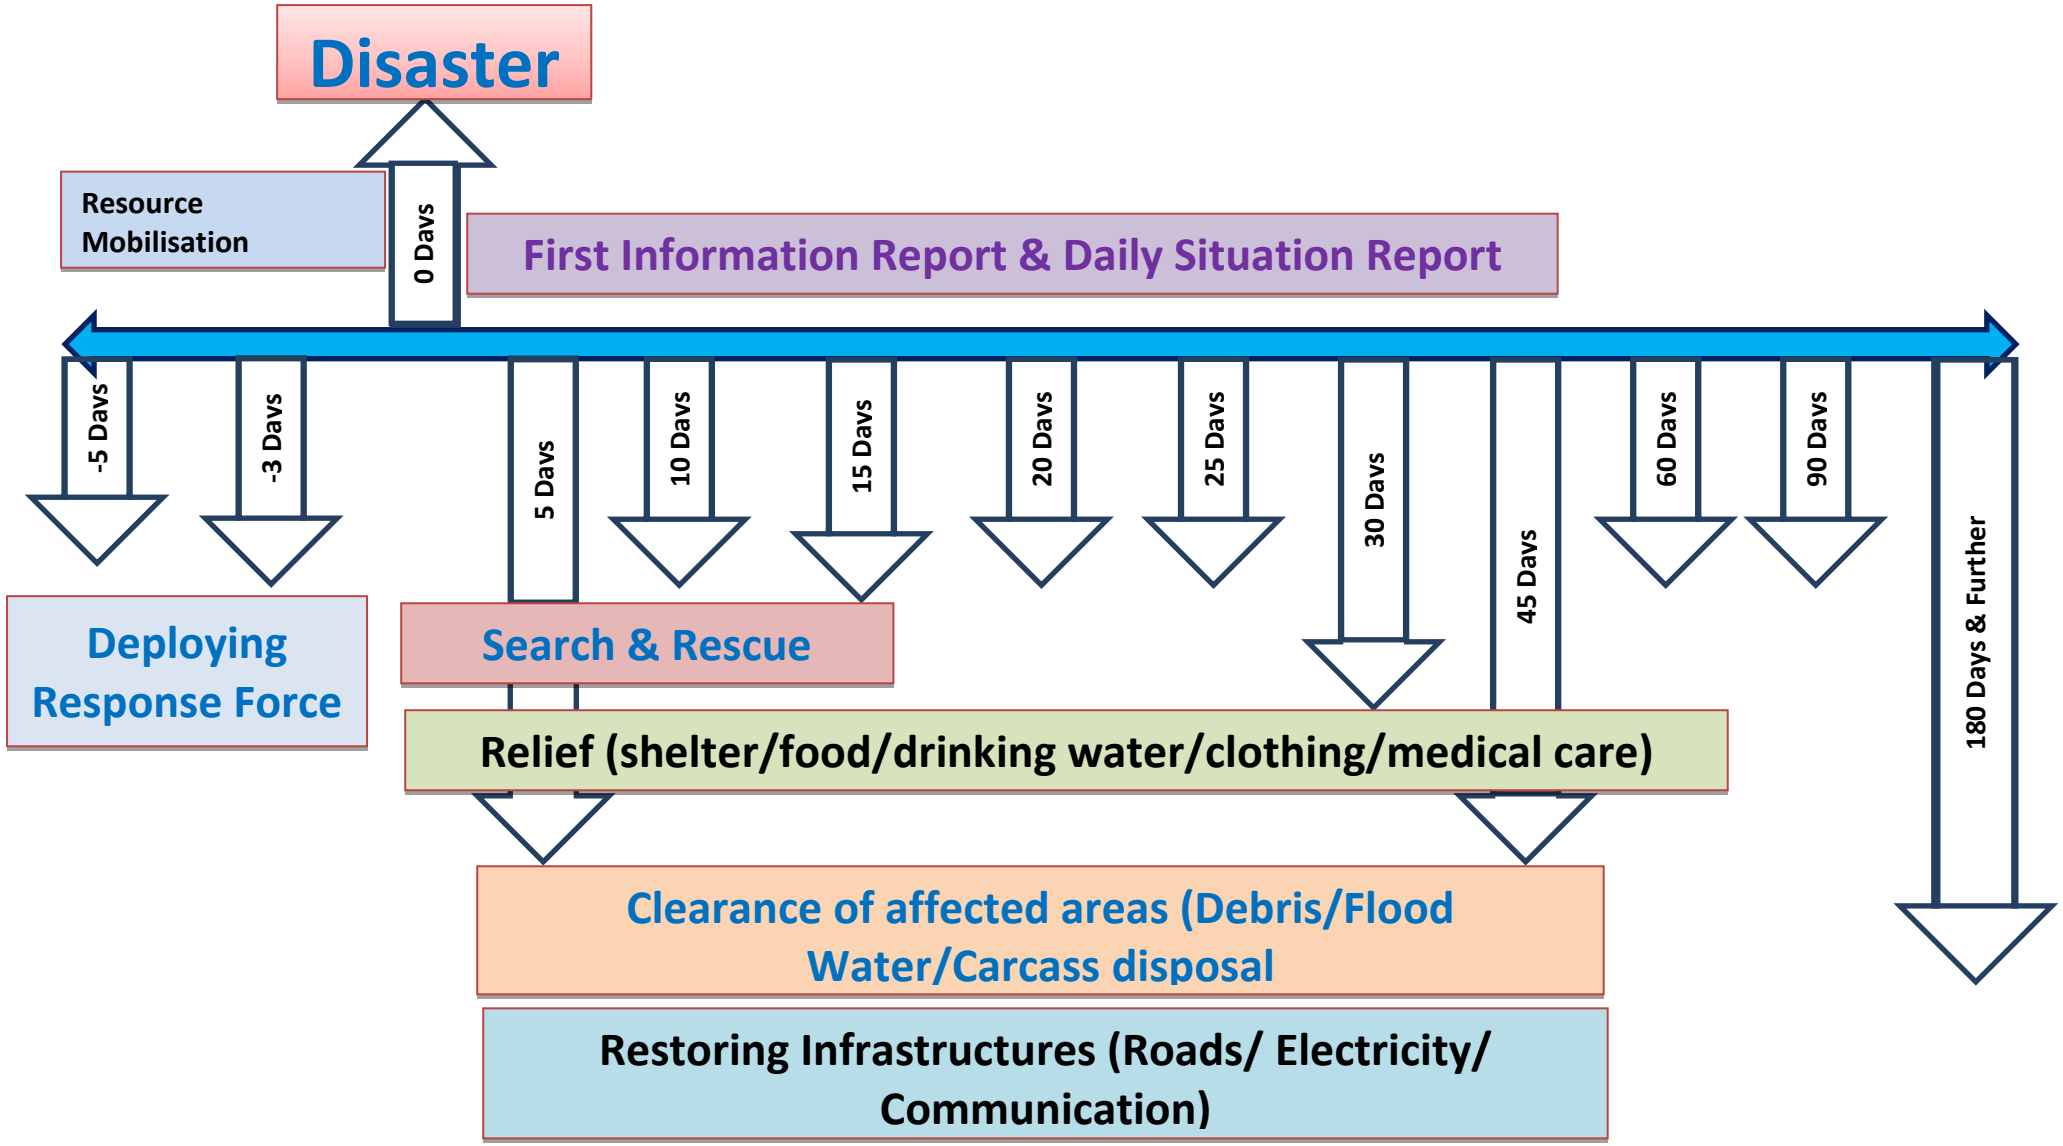

Response refers to activities done for handling disaster to bring the situation to normalcy not exceeding fifteen days from the abatement of disaster. The onset of an emergency creates the need for time sensitive actions to save life and property, reduce hardships and suffering, and restore essential life support and community systems, to mitigate further damage or loss and provide the foundation for subsequent recovery. Effective response planning requires realistic identification of likely response functions, assignment of specific tasks to individual response agencies, identification of equipment, supplies and personnel required by the response agencies for performing the assigned tasks. A response plan essentially outlines the strategy and resources needed for search and rescue, evacuation, etc.

10.1 Phases of Response: Timeline

Figure No- 9

10.2 Relief Management: Timeline **Figure-10**

10.3 Response

Response: District

Task	Activity
Warning Communication	• Warning dissemination to the list of Nodal person & concerned BDOs • Recording the receipt of information & regular Status update • Transmitting updates to SEOC in regular interval as instructed
Meeting of DDMA (Heads of the department & stakeholder)	• Collector to take up a department coordination meeting & distribute works among all the Departments • Collector issues circular to keep Govt. offices open cancelling all holidays. • A fixed time to be finalized every day for reporting at all level. • A nodal officer is identified for media management • Circulate the minutes of the meeting with clear-cut role & responsibility
Pre-positioning of staff, resources & Evacuation	• Identifying & designating Nodal Officer for different stages of disaster & affected areas. • Positioning of ODRAF/NDRF/Fire services/ Police/Home Guard in the affected areas • Pooling Volunteer services (Civil Defense/Task Force/NCC/NSS/Scout & Guide) • Take stake of required materials for search & rescue, first aid, casualty management, evacuation, relief etc. • Make necessary arrangements of shelters for evacuation • Constitute a special team for special care to vulnerable section like Specially abled, Sr. Citizen, Pregnant & lactating women, Infants & children etc.
Response	• EOCs to Ensure back up (Power/Fuel/internet/ Communication at Dist/Dept. & Block levels • Response force under guidance of Nodal officers ensure complete Evacuation (Human/ Animal), carry out Search & Rescue, clear relief lines, • Collector to submit requisition of vehicle/boat/ helicopters & list of support from state & Centre to all concerned authorities • CSO to store required relief materials (Chhuda. Gur, Dry Foods) in the nearby storage points • CDVO to store, transport & distribute required fodders for animals to the affected areas

	• Cyclone shelter committee & Village Disaster management committee to organize free kitchen in the shelters with help of revenue dept. • EE- RWSS & CDMO to ensure supply of drinking water, disinfection of water & maintain Health & hygiene in the shelters • CDMO to carry out First aid & casualty management • Collector to collect & transmit First Information Report (FIR) & Daily Situation Report as per requirement

10.4 Response : Community Level

Activity
• DEOC to dissesiminate warning communication to BEOC & Community • Response force to ensure Power/Fuel/internet/ Communication at Shelters back up • Supply Inspectors & Marketing Inspectors to distribute relief materials with response force, Task force & volunteers • Response force to carry out Search & Rescue measures, Emergent relief operation, Relief line clearance, distribution of relief • Doctors to carry out First aid & casualty management, Carcass disposal & sufficient mortuary facility in the affected areas

10.5 Response: Family & Individual Level

Task	Activity
Response	• Listen to the instruction of the response force & warnings • Economic use of "Ready to go Emergency Kit" Ready to go First Aid Kit • Cooperate the response force/officers & Render volunteer service if asked for • Maintain cleanliness & hygiene at shelter

10.6 Response: Standard Operating Procedures for Departments

Name of the Department	On Receiving Warning	Response time	Post Disaster
Collector	To immediately convene DLCNC/DDMA meeting Activate DEOC & Early Warning Dissemination Work- distribution among officers for impending disaster & its management Issue instructions & guidelines regarding preparedness, response activities, stocking of food stuff including analysis of resource available Issue directives to keep offices open and to function Control Room Pool of vehicles/private Boats, activate Evacuation (Normal/Forceful) & coordination Calamity Management Group at District level to review situation every day. Crisis, if any shall be solved with intervention of Collector	Activate Search & Rescue Arrange adequate temporary shelters Immediate logistics arrangement in shelters/Relief Camps Workout innovative steps & plan (evacuation(Normal/Forceful) / Switch on emergent relief) Deployment of ODRAF team/Fire Services/ Cyclone & Flood shelter level search & rescue/First-aid Teams/NSS volunteers Involvement of local volunteers/Village Committee Team for relief works Collection of reports on response activities ongoing	Activate relief line clearance Proper relief distribution Rapid damage assessment Reporting of Primary damage statistics to Govt.and subsequently final damage report. Facilitate Ex-gratia & all type of Compensation under the SDRF/NDRF norms of assistance Care for critically injured Keeping expenditure accounts/Submission of reports
CDMO	Disseminate cautionary messages for alerting all concerned/sensitization of MOs/Medical staff for their services in affected area Arrangement of medicine, First aid kits & teams Mobile Health units for inaccessible pockets Identifying & shifting patients requiring intensive	Mass Casualty Management units & Triage First Aid Centers Ambulances services & Measures to shift patients requiring intensive care	Post Disaster Disease surveillance system & check spreading of epidemics, if any Disinfection of water sources & measures for health & hygiene Carcass Management & Issuance of

	care to safer places Supply of medicines & pre-positioning of medical teams to vulnerable areas Vaccination for prevention of communicable diseases Measures to disinfect drinking water Availability of Blood Banks/Ambulance Special arrangement in Hospital for treatment of affected persons	Effective coordination with Private Health professionals for health services Deployment of Medical surgical teams Arrangement of adequate mortuary facility Pool of Blood donors (Preferably each group) Additional laboratories Carcass disposal team & units IEC activities on general health & hygiene	Death Certificate Carry out trauma & psycho-social counseling P.M.reports/ viscera reports to be issued quickly which is required for death cases occurred due to disasters for sanction of Ex-gratia assistance
Superintendent of Police	Dissemination of Warning messages for alerting all concerned Overall traffic management and patrolling of all highways and other access roads to disaster sites Identification of crucial issues i.e. act of miscreants, smooth dispatch of relief materials, relief road line in case of roads submerged/overtopped by flood/heavy rain Security in transmit camps / feeding Centers / relief camps / Cattle camps/ Cooperative food stores and distribution centers. Providing assistance to district authorities for taking necessary action against hoarders, black marketers and those found manipulating relief	Overall traffic management and patrolling of all highways and other access roads to disaster sites Provide Security support in transmit camps / feeding Centers / relief camps / Cattle camps/ Cooperative food stores and distribution centers Coordination with defense personnel/NDRAF/ODRAF/Fire service carrying out rescue & relief operation in the affected area	Coordination with defense personnel/NDRAF/ODRAF/Fire service carrying out rescue & relief operation in the affected area Damage assessment relating to own infrastructure and reporting Support for ongoing relief & rehabilitation activities

	material. Assistance to district authorities for smooth evacuation of people/livestock (Normal/Forceful) Coordination with defense personnel/NDRAF/ODRAF engaged for rescue & relief operation in the affected area Installation of temporary Wireless stations where the telephone/mobile connectivity is not available for communicating flood related matters Providing assistance to the community in organizing emergency transport or injured.		
EE- RWSS	To strengthen preparedness to meet the situation and alert all concerned for emergency services Identification of water scarcity pockets and arrangement to be made to mitigate the crisis Keep all drinking water supply systems in rural areas in working condition/mobilization of tankers/PVC tanks to areas/pockets of water crisis All hand pump tube well/PWS systems/stand posts are kept in running condition Adequate spare parts are available for repair of water sources including gensets, POL and vehicle Take stock of available resources and additional requirement, if any & pre-contract with suppliers Follow own SOP/Contingency Plan for mitigation of disaster	Mobilization of tankers/PVC tanks to areas/pockets of water crisis Filed staff to facilitate services for smooth running of relief shelters Disinfecting the drinking water sources Standby the sources submerged till its disinfection	Inspection,Repair & restoration of all hand pump tube well/stand posts in a time bound manner Damage assessment & reporting Provision of tube wells to meet the water requirement of public

EE- Irrigation	Dissemination of cautionary messages to all concerned To strengthen preparedness and available resource to mitigate the crisis Closure of breaches,if any occurred in embankments and canals/ strengthening of weak points Communication establishment & effective coordination with District and Block/ Tahasil Control Rooms and departmental offices within the division during flood An officer to be appointed as Nodal Officer Activation of flood monitoring and response mechanism Evolve mechanism for forewarning, attention towards down streams/ judging live storage / alerting in case of evacuation / coordination with local administration and other Water Resource bodies Watch and assess the river gauge and reporting to state and district head quarters Inlet and outlet channels are cleared Special attention to weak embankments and stock piling of materials, to check flood Follow own SOP and Contingency plan to combat flood	Communication establishment & effective coordination with District and Block/ Tahasil Control Rooms and departmental offices within the division during flood Closure of breaches, if any occurred in embankments and canals/ strengthening of weak points Watch and assess the river gauge and reporting to state and district head quarters Special attention to weak embankments and stock piling of materials, to check flood	Inspection,Repair of embankments in a time bound manner and strengthening Damage assessment & reporting Bring the reservoirs upgraded to cater to the need of irrigation water/ drinking water Adequacy of water for Khariff through canals/ MIPs/LIPs in ayacut area up to tail end In case of distress rain, construction of check dams over streams, rivers and nalas to save standing crops. Innovative steps and planning for water conservation and to rid of flood disaster

Dy. Dir. Agriculture	Communication establishment with District and Block/ Tahasil control room and departmental officers within the division An officer to be appointed as nodal officer Information provided about the disaster and likely damages to crop and plantation Organized transport, storage and distribution of seeds/ fertilizers/ pesticides Surveillance for pests attack and diseases of crop, ameliorative measures and facilitation of agri-inputs Establishment of farmers club and sensitization and stress-counseling for farmers during stress period Identification of different areas to be affected by the hazard and diversification of crop pattern.	Survey of crop loss in the field through eye estimation and Crop Cutting experiment Implementation of Crop Contingency plan in different stages of crop growth under adverse climatic condition.	Assessment of affected area of Crop/quantity of crop loss and reporting Reporting from time to time on standing crop condition & progress of agriculture operations. Providing assistance to District authority for preparation of list of farmers & disbursement of Agriculture Input subsidy Prepare Crop Plan to reimburse the gross productivity of grains Counseling farmers on schemes introduced by Govt. for their help Organized transport, storage, facilitating seeds/ fertilizers/ pesticides & agri-inputs
EE- Rural Works	An officer to be appointed as nodal officer Arrangement of extra vehicles/ heavy equipments, such as front-end loaders/ towing vehicles/ earth moving equipments/ cranes etc. .Adequate stock of road repairing materials such as earth, stone chips, morrum etc. Effective co ordination with sub division and field officials in charge of maintenance. Follow own SOP and contingency plan for calamity mitigation.	Inspection and emergency repair for roads/ road bridges/ underwater inspection/ piers/ concrete and steel work Arrangement for clearance of road blockade for commuters In case of submerging of roads, adequate road signs to guide and assist the drivers to be installed. Barricading roads/bridges	Inspection of damaged infrastructure, immediate repair and restoration. Rapid assessment of damages to road, culvert and other critical infrastructure and submission of report to proper quarters. Strengthening and restoration of infrastructure with an objective to eliminate the factors which caused

		submerged or over topped by flood water to avoid hazard and erection of cautionary hoardings. Mobilizing of community and their assistance for road clearing and sub-way	the damaged. Repair reconstruction of village infrastructures including Govt. buildings, roads, drains, hospitals etc Take on construction of temporary roads to serve as access to temporary transit and relief camps and medical facilities for disaster victims and also general public.
EE- Public Works	An officer to be appointed as nodal officer Arrangement of extra vehicles/ heavy equipments, such as front-end loaders/ towing vehicles/ earth moving equipments/ cranes etc. .Adequate stock of road materials i.e. earth, stone chips, morrum etc. Effective co ordination with sub division and field officials. Follow own SOP and contingency plan for calamity mitigation.	Inspection and emergency repair for roads/ road bridges/ underwater inspection/ piers/ concrete and steel work Arrangement for clearance of road blockade for commuters Barricading roads/bridges submerged or over topped by flood water to avoid hazard and erection of cautionary hoardings. In case of submerging of roads, adequate road signs to guide and assist the drivers to be installed. Mobilizing of community and their assistance for road clearing and sub-way	. Rapid assessment of damages to road, culvert and other critical infrastructure and submission of report to the higher quarters. Strengthening and restoration of infrastructure with an objective to eliminate the factors which caused the damaged. Repair reconstruction of infrastructures including Govt. buildings, roads, drains, hospitals etc Take on construction of temporary roads to serve as access to temporary transit and relief camps and medical facilities for disaster

			victims and also general public. Institute repair of paved and unpaved road surfaces, including age metaling, pothole patching and any failure of surface, foundation in the affected areas by deploying staff with Maintenance Engineer and keep monitoring their conditions from time to time. Construct / reinforce the connecting roads from habitations.
DTO-Telecom	Arrangements for keeping telephone lines in order all communication equipment installed at DEOC and EOCs for calamity works	Institute mechanism in the affected areas by deploying staff with Maintenance Engineer and keep monitoring their conditions from time to time.	Assessment of damage and restoration of communication network.
CDVO	Follow own SOP and contingency Plan. Focus on evacuation of cattle to safe shelters and arrangement of cattle feed and sensitizing people. Dissemination of cautionary messages to field functionaries for making public aware. Strengthening of the dispensaries/ Livestock Aid centers with staffs, medicines, and equipment to proper health care of the animal.	Monitoring of cattle condition and feed and shelter. Officials to remain in readiness to attend for treatment of affected livestock.	Rapid loss assessment of livestock and reporting. Strengthening of the dispensaries/Livestock Aid centers with staffs, medicines, and equipment to proper health care of the animal. Capacity building of the grass root extension workers/Para worker/ farmers on animal health care and hygiene, AI/breeding, birth care

			etc. Popularization of the cultivation of nutritious fodder grasses or trees in the home stead/field bunds of farmers/village pasture lands etc. through demonstration unit, mini kit distribution etc. Storage, Processing, Market linkage, Price fixatation of the livestock products Promotion of the development of Institutions like Milk Cooperatives, Goat grower association etc. for better access to market, credit etc.
District Fisheries Officer	Appoint a Nodal Officer Disseminate calamity warnings for awareness of Fisherman community not to venture into sea or lake/ fish farmers to take follow up action. Keep ready his staff as well as staff in field to render services as and when required.	Keep co ordination with local administration for management of disaster from time to time. DTO-Telecom	Assessment of damage and restoration of all telecommunication network. Ensure all communication equipment installed at DEOC.
CDVO	Popularization of the livestock farming as one of the viable alternative livelihood option in the normal year in particular and in drought year in general through awareness generation, attractive schemes etc. Improvement of the quality and productivity of local livestock through Artificial Insemination and other breeding process. Strengthening of the dispensaries/Livestock Aid centers with staffs, medicines, and equipment to proper health care of the animal. Capacity building of the grass root extension workers/Para worker/ farmers on animal health care and hygiene, AI/breeding, birth care etc.

	Popularization of the cultivation of nutritious fodder grasses or trees in the home stead/field bunds of farmers/village pasture lands etc. through demonstration unit, mini kit distribution etc. Storage, Processing, Market linkage, Price fixation of the livestock products Promotion of the development of Institutions like Milk Cooperatives, Goat grower association etc.for better access to market, credit etc.
Dist. Fisheries Officer	Introduction of pisciculture in all the Dams, Reservoirs/MIP/GP tanks and other bodies. Supply of quality and productive fingerlings of fast growing/improved fish species. Capacity building of fish farmers/grass root extn. Workers/SHG members on commercial pisciculture, fish seed and feed production etc.
DFO	Improvement of the Vegetation coverage and Biomass production to meet the multiple community need like food, fuel wood, fodder etc. through three-tier plantation. Regeneration of degraded village Common Property Resources like village forest, waste land through the gap filling and block plantation of multipurpose tree species. Prevention of indiscriminate forest felling through strict introduction of rules and regulation and massive awareness generation. Strengthening of the community based organizations like VSS through various training, exposure, orientation, and sensitization and ensures the involvement of the local community in forest management (regeneration, protection etc.) Fair Collection and marketing of the NTFP products Restricted grazing of the cattle herd in the forest area is to be ensured to protect the natural regeneration of the forest ecosystem.
Railway	Develop mechanism of Rapid access to the site of the accident. Effective site management by making best use of on-board and locally available resources. Speedy transportation of victims to hospital.

	Proper communication system both for assisting the stranded passengers as well as giving out timely information to the media.
EE- Electricity	Attend sites of electrical accidents and assist in undertaking damage assessment. Stand-by arrangements to ensure temporary electricity supply. Inspection and repair of high tension lines /substations/transformers/poles etc. Ensure the public and other agencies are safeguarded from any hazards, which may have occurred because of damage to electricity distribution systems. Restore electricity to the affected area as quickly as possible. Replace / restore of damaged poles/ salvaging of conductors and insulators.
EE – PHED	Provision of tube wells at the squares, market places, bus stops, public buildings like schools, hospitals etc. as well as in places of religious gatherings Alternate drinking water sources to affected area Construction of drains for easy discharge of the flood water, wastewater and sewage IEC campaign for safe drinking water and sanitation to prevent any health hazard in normal time in general and during disaster in particular.
DPC, SSA- School & Mass Education/ DEO - Higher Secondary Education	Department and the field level institution will prepare a contingent Action Plan for their reconstruction. Damaged buildings (including classroom building, department building, and broken windows) should be assessed and the report is to be sent to concerned administrative Deptt for adequate funding for repair and reconstructions of building, boundary wall, Hostels etc. Trauma counselling in schools for affected children

RECOVERY

A series of long term activities framed to improve upon the repaired activities in the Reconstruction & rehabilitation phase are covered under Recovery phase. Recovery includes all aspects of mitigation and also incorporates the continuation of the enabling process, which assists the affected persons and their families not only to overcome their losses, but also to achieve a proper and effective way to continue various functions of their lives. The Recovery process is therefore a long-terms process in which everyone has a role – the Government including the PRI members, NGOs and especially the affected people, their families and the community.

- Preparation of Recovery plan for displaced population, vulnerable groups, environment, livelihoods
- Organise initial and subsequent technical assessments of disaster affected areas and determine the extent of recovery works necessitated in addition to reconstruction & rehabilitation works.
- Evaluate the extent of works under SDRF/NDRF & other sources(damaged infrastructures)
- Explore opportunities for external aids like (International Agencies / Civil Society / Corporate Sector)
- Allocate funds for the stabilisation of the repaired & reconstructed infrastructure.
- Integrate Climate change & Disaster Risk Reduction features in the recovery programmes
-

The DM & Collector will be the co-ordinator of all Recovery activities in the District. The role of the DM & Collector will be to:

- Generally monitor the management of the recovery process
- Ensure implementation of the recovery plan by line departments, blocks.
- Effective service delivery minimising overlap and duplication

FINANCIAL ARRANGEMENTS

13.1 National Disaster Response Fund (NDRF)

The National Disaster Response Fund (NDRF) has been constituted by the Government of India as per the sub-sections (1) of section (46) of Disaster Management Act, 2005 and recommendation of the 13th Finance Commission. NDRF has been constituted by replacing the National Calamity Contingency Fund (NCCF).It is administered by the National Executive Committee (NEC).

In the event of a calamity of a severe nature when the State Disaster Response Fund (SDRF) is insufficient to meet the relief requirements, additional central assistance is provided from NDRF, after following the laid down procedure. The State Government is required to submit a memorandum indicating the sector-wise damage and requirement of funds. On receipt of memorandum from the State,

- An Inter-Ministerial Central Team is constituted and deputed for an on the spot assessment of damage and requirement of funds for relief operations, as per the extant items ad norms.
- The report of the Central Team is considered by the Inter-Ministerial Group (IMG) / A Sub-committee NEC constituted under section 8 of DM act, 2005, headed by the Home Secretary.
- Thereafter, the High Level Committee (HLC) comprising of the Finance Minister, the Agriculture Minister, the Home Minister and the Deputy Chairman, Niti Ayog considers the request of the State Government based on the report of the Central Team recommendation of the IMG thereon, extant norms of assistance and approves the quantum of assistance form NDRF.
- This is, however, subject to the adjustment of 75% of the balance available in the State's SDRF for the instant Calamity.

13.2 State Disaster Response Fund (SDRF)

As per the provisions of Disaster Management Act, 2005 sub-section (1)(a) of Section (48) and based on the recommendation of the 13th Finance Commission, the Government of Odisha has constituted the State Disaster Response Fund (SDRF) replacing the Calamity Relief Fund (CRF). The amount of corpus of the SDRF determined by the 13th Finance Commission for each year the Finance Commission period 2010-15 has been approved by the Central Government. The Central Government contributes 75% of the said fund. The balance 25% matching share of contribution is given by the State Government.

The share of the Central Government in SDRF is released to the State in 2 installments in June and December respectively in each financial year. Likewise, the State Government transfers its contribution of 25% to the SDRF in two installments in June and December of the same year.

Ministry of Home Affairs, upon being satisfied that exigencies of a particular calamity so warrant, may recommend an earlier release of the Central share up to 25% of the funds due to the State in the following year. This release will be adjusted against the installments of the subsequent year.

As per the Guidelines on Constitution and Administration of the State Disaster Response Fund (SDRF) laid down by the Ministry of Home Affairs, Government of India, the SDRF shall be used only for meeting the expenditure for providing immediate relief to the victims of cyclone, drought, earthquake, fire, flood, tsunami, hailstorm, landslide, avalanche, cloud burst and pest attack. The State Executive Committee (SEC) headed by the Chief Secretary SEC decides on all matters connected with the financing of the relief expenditure of immediate nature from SDRF.

13.3 Chief Minister Relief Fund (CMRF)

Chief Minister's Relief Fund aims to provide assistance to calamities and in distress condition, to indigent persons suffering from critical ailments and to undertake charitable activities for public welfare.

13.3.1 Cases Eligible for Assistance under CMRF

13.3.1.1 Poor and persons in distress: Relief to the poor, including grant and aid (financial or otherwise) to persons in distress.

13.3.1.2 Aged, differently able, orphans, AIDS affected : Assistance for the relief and rehabilitation of the aged, differently able' orphans, HIV/AIDS affected persons/families and those otherwise differently able or incapable of earning their livelihood, by grant and aid (financial and otherwise) and / or maintenance, establishment and support of institutions and homes for the benefit of such persons.

13.3.1.3 Persons affected by calamities or violence: Assistance for relief & rehabilitation of persons affected by natural or man-made calamities, communal violence', naxal violence or public disorder of a serious nature or any other calamity' affecting a family or a community, which deserves extreme compassion and not covered under any existing assistance scheme of State/central Government.

13.3.1.4 Assistance for Rural Development: Financial assistance out of CMRF may also be considered to undertake, promote, aid or otherwise support rural development including any programme for promoting the social and economic welfare of the public in any rural area either directly or through an independent agency following due procedure.

To assist more number of deserving person and for better utilisation of the Chief Minister's Relief Fund, the State Government have delegated powers to the Collectors for sanction of assistance out of CMRF so as to extend such assistance to the deserving persons immediately at the time of their need.

13.4 Release of Funds to Departments and Districts:

Funds required towards pure relief to affected persons / families for natural calamities in shape of emergency assistance, organizing relief camp / free kitchen / cattle camp, agriculture input subsidy and other assistances to affected farmers, ex-gratia as assistance for death cases, grievous injury, house building assistance, assistance to fisherman / fish seed farmers / sericulture farmers, assistance for repair / restoration of dwelling houses damaged due to natural calamities are administered through the respective collectors.

Part funds towards repair / restoration of immediate nature of the damaged public infrastructure are released to the Departments concerned. On receipt of requisition from the Collectors / Departments concerned, funds are released after obtaining approval / sanction of S.E.C. However, funds towards pure relief are released under orders of Special Relief Commissioner / Chief Secretary and the same is placed before the State Executive Committee in its next meeting for approval. To save time, Collectors have been instructed to disburse the ex-gratia assistance from the available cash and record the same on receipt of fund from Special Relief Commissioner.

13.5 Damage Assessments and Report after Flood/Cyclone

Private properties and properties of Government under different Departments are damaged by high floods and cyclones. As per para-75 of Orissa Relief Code, the Collector shall undertake assessment of damages to private properties as well as properties of Government. This assessment shall be done quickly soon after the abatement of flood in the prescribed formats prescribed in Appendix- X of Orissa Relief Code.

13.5.1 Submission of preliminary damage report (Para-76 of ORC)

1. The Collector as well as the district level officers under each Department of Government shall immediately after assessment of flood damage forward a copy of their report to their immediate Head of Department. The district level officers may also supply reports to the Collector.
2. The Heads of Departments after necessary scrutiny shall forward their reports to their respective Departments of Government with copy to Special Relief Commissioner, not later than two weeks from the date of abatement of flood.
3. The Special Relief Commissioner shall compile the State report and shall furnish the consolidated preliminary report to the Revenue Department within a week of the receipt of the reports from the Heads of Department.
4. The preliminary flood damage report should be prepared as accurately as possible, as the relief measures, if any, are to be based on the merit and statistical data of that report.

13.5.2 Submission of final flood damage report (Para-77 of ORC)

The concerned Heads of Departments as well as the Collector shall take immediate steps to compile the final report on flood/cyclone damage in the formats prescribed in Appendix- X soon after submission of the preliminary report.

Accidental errors, clerical mistakes, shortcomings, if any, noticed should be rectified in the final report. The final report shall be made available to Special Relief Commissioner as soon as possible and not later than one month from the date of abatement of flood.

On receipt of the reports from the different sources, Special Relief Commissioner shall forthwith compile the State report and furnish the same to the Revenue Department.

13.6 Central and State Government programmes and Schemes on Natural Calamities

Mainstreaming Disaster Management in development planning is the most critical component to mitigate disaster risks. That's why it's important to make note of financial resources which are used in the implementation of such programmes and schemes which can lessen the risk from disasters by reducing vulnerability. It is also crucial to build communities resilience to deal with them. Moreover, as mandated by Ministry of Finance & Ministry of Home Affairs on 01st and 03rd June, 2014 respectively, 10 % flexi-fund within the centrally sponsored schemes (CSS) to be utilised, inter alia for mitigation / restoration activities in the event of natural calamities in the sector covered by CSS. Thus, relevant Central Government and State Government funded schemes are identified which are crucial to build over resilience of communities in the context of the district.

13.7 Roles of District Planning committee on financial outlay on mainstreaming Disaster Risk Reduction (DRR) in development programms.

The DPC is generally composed of elected members of the local bodies within the district, both rural and urban, as well as some nominated members. The number of members varies with the population size of the districts. The ration of members from Panchayats and ULBs is based on ratio in which the population of the district is divided between rural and urban areas. An examination of the composition of the DPCs is vital form two perspectives:

I. It reflects the degree of inclusion of marginalized sections in the district planningprocess.
II. It reflects the degree to which the DPC is actually a body independent ofstate control and interference.

The role of DPC should have the following roles in mainstreaming DRR in development programmes.

I. Provision for adequate budget, dedicated staff, capacity development, a monitoring framework, and interdepartmental cooperation need to be in place for effective mainstreaming.
II. More attention needs to be paid to the monitoring and measuring of mainstreaming. This should include an assessment of inclusion of gender issues and Below Poverty Line families in climate change planning.
III. Risk diversification in the context of unpredictable climate patterns is necessary. The options need to include effective programmes of contingency crop planning, crop diversification including the use of hazard resistant crops as well as promoting supplementary income generation from off-farm and non-farm activities.
IV. The main obstacle in the path of government departments being able to address climate change concerns is dedicated personnel. Officials need to be highly skilled and trained. Additional qualities that an official needs to have in order to function effectively include empathy and communication.
V. Detailed procedures that list the precise steps that are to be implemented in case of an emergency and by whom need to be put into place. This will ensure that systems work irrespective of the caliber of the individual official in position at that time. Preparation for a disaster as well as risk reduction should be incorporated in the development agenda of all departments. This step will ensure that citizens who are usually the first

on the scene of a disaster are well-equipped to deal with emergencies and also reduce dependence on the National Disaster Response Force.

VI. To facilitate the process a set of checklists are given for vetting different projects/ developments through the lens of DRR and CCA as well as to check that they protect the communities from future disaster risks and do not increase their vulnerabilities to disasters.

13.8 Fund provision for disaster preparedness & capacity building

Special Relief Commissioner and OSDMA have to provide necessary funds for preparedness and capacity building activities at the dist. and below level. The detailed capacity building plan has already been discussed in Chapter – VI with outline of temtative training programmes at varipus level. Appart from those necessary steps will be taken by the Authority to mobilise resources from the corporate houses like NALCO, HAL and banking instiurtions for initiating various DRR activities in the district.

Chapter- 14
Preparation and Implementation of District Disaster Management Plan

14.1 Procedure for preparation of DDMP as per the DM

The provisions of section 30 (2) of the DM Act 2005 makes it mandatory on the part of District Disaster Management Authority to prepare the DDMP including the response plan of the district and which shall consist of mapping of various disasters and the vulnerable areas of the district, measures to mitigate them and define the administrative framework for coordination and dissemination of such information to the general public. Based upon this plan all the departments at the district level shall also prepare their response plan to manage the disaster in an effective way. This is an attempt of the DDMA to identify the vulnerable areas in the district and prepare the plan for preparedness, prevention, mitigation, response, recovery and capacity building along with the Standard Operating Procedures for different departments. It is prepared purposefully in Two Volumes to serve as a ready to use guide and fit to all the stakeholders in management of disaster an effective and efficient way.

14.2 Roles of ADM, DEO and Nodal Officers support from other line Departments to be defined

I. Collector had ssue of necessary instruction to the line department and provided inputs for betterment of the plan.

II. The DEO/DPO attended traning programmes at OSDMA and segregated the tepltae department wise. Desk Review of DDMPs, decisions of DDMA, DLNCC of previous years, District gazetteer, Contingency Plan of the departments, coordinated line department officials to provide information in time, consulted head of the departments for improvisation of DDMP 2019.

III. The Departments prepare and submitted report related to Hazard, Vulnerability and capacity analysis of the district in the prescribed format and reviewd the plan in the meeting.

14.3 Support of line departments

All the line departments have provided the information as per the prescribed format though in little delayed. 3 no of meetings have been organised for upadating the DDMP 2019 and validation of data.

Chapter- 15
LESSONS LEARNT AND DOCUMENTATION

The process involved in preparation of District Disaster management Plan 2019 is not only collection of data and compiling, it involves analysis, critical timings and justifying each data with the relevance of any hazard in the context of Koraput. This is also a self evaluation process as a Disaster Management Professional how the district is aware of disaster management concept and what is the benchmark. It gave a platform for where to start in disaster preparedness in this District. The district used to face the the hazards like flash flood, drowning, lightening, etc until the Very Severe Cyclonic Storm "Hudhud" which was the first ever experience of Cyclone in Koraput.

Koraput district located on the backdrop of green valleys reflecting immaculate freshness was established on 1st April 1936. Decorated by dense forests, waterfalls, terraced valleys and dating springs; the district is very much influenced by its rare gifts of nature which have attracted some aboriginal races like the Gadabas and Bondas and gives them shelter in its lap. The climate of the district is mainly tropical in nature and it is effectively controlled by the South-Western monsoon and the retracting North-Eastern monsoon. The district being situated in the western fringe of Eastern Ghats, the climate of the district is more similar to that of the Deccan than that of the coastal plains. In spite of that the Very Severe Cyclonic Storm "Hudhud" passed through the district after being landed near Visakhapatnam, Andhra Pradesh, on October 12, 2014. The storm "Hudhud" passed through Koraput district in the evening of 12th October 2014. Under its impact the districts reportedly experienced wind speed of 80-100 kmph.

Due to the effect of cyclonic storm, heavy rainfall occurred in many parts of Koraput district from 11h to 14th October 2014. The average rainfall of the affected areas of Koraput recorded on 12th and 13th of October 2014 was 154.4mm. The damage that took place in the poor tribal villages was horrific. Approximately 1204 villages were affected by this storm by damaging 10158 nos of houses of 3.93 lakhs population. 41246 Ha of crop were damaged, out of which 9666 Ha of crop were damaged with more than 50%. Fortunately there was no human causality case reported due to the cyclonic storm Hudhud. Pottangi is the worst affected block in the district with 3571 damaged houses from 93 affected villages of 14 Gram panchayats. It holds 35-40% of out of the total damages happened in Koraput due to the cyclonic storm Hudhud.

The concept of disaster preparedness will be spreared over next few years to aware the people about various disasters in Koraput and its preparedness which has been reflected in the plan.

15.1 Mock Drill Exercise 2018

With a view to enhancing the District and Community level emergency planning to deal with various disasters, District Disaster Management Authority (DDMA) with collaboration with different departments and quick response team coordinated Mock Drill on 19th June 2018 as like previous years. This helped in generating substantial awareness among all the stakeholders. The aim of Mock Drill was to inculcate a culture of preparedness amongst the community, to evaluate the resources available with various districts of the state, to coordinate the activities of various agencies and use the feedback to identify the gaps and improve upon them. The objectives of the Mock Drill are to Generate Public Awareness on Disaster Preparedness and activate the ODRAF, Fire Service, FSMMC members and other stakeholders to get prepared for the monsoon related hazards if any like drowning, flood, cyclone, snakebite, lightning, etc.

The programme was conducted at district level, all the block headquarters and at flood shelters simultaneously. The NGO-EKTA, Koraput facilitated the mock drill programme at all the shelter level. All the stakeholders including ODRAF, Fire service, Civil Defence, community, Youth Red cross students from school & colleges, Govt. officials, PRI members, Anganwadi & Asha workers etc attended the programme at different level on 19th June 2018. Few of the photographs of the programme is attached below for ready reference.

15.2 Disaster Preparedness Day 2018

The Disaster preparedness day and National day for disaster risk reduction 2018 was organised on 29th October 2018 in the campus of Govt. Girls High School, Koraput in a befitting manner. The stakeholders from ODRAF, Fire service, HAL-Fire Safety wing, Civil Defence, PRI members, School teachers and students attended the programme. Essay, Debate and Drawing competition on Disaster theme was organised among the schools in the schools of Koraput Hqr and the prizes were distributed to the meritorious students on that occasion. A mass rally of 300 nos. of students with placards and slogans covered the town of 10 Kms with the objective of mass awareness of people on disaster preparedness. Finally, the main event Mock Exercise was conducted by all the response teams on SAR, building rescue, Fire safety, improvised techniques, etc. Few of the phtotgraphs of the programme is given below.

15.3 Distribution of Lightning Safety IEC Materials

Lightning has created havoc everywhere due to the increasing trend of death toll all over the state. In Koraput, lightning death is in increasing trend for which lightning safety posters have been supplied to all the schools, govt. offices and other public places for mass awareness of general public. During the year approximately 5000 nos. of IEC posters as developed and supplied by OSDMA have been affixed in all the school class rooms, public places, Govt. offices for mass awareness on DOs and DO NOT DOs of the public during lightning

DISTRICT DISASTER MANAGEMENT PLAN 2019

(VOLUME- II)

PREPARED BY:

DISTRICT DISASTER MANAGEMENT AUTHORITY KORAPUT

Shri K Sudarshan Chakravarthy, IAS

Collector & D.M.- cum-Chairman,
District Disaster Management Authority,
Koraput

MESSAGE

Disaster Management requires meticulous planning. District Disaster Management Plan (DDMP) is such a document which envisages the preparedness of District Administration with all its inventory of resources and capacity to tackle any eventuality in the district. The DDMP-2019 has been prepared in consultation with various departments and other stakeholders that will serve as a guiding document for timely and planned response to mitigate the damaging effect of any hazards systematically and scientifically.

Koraput District has experienced the Very Severe Cyclonic storm '*Hudhud*' during 2014 which was managed systematically with zero casualty in the district and the effect was minimised. Moreover, there is very possibility of flood and related health hazards during monsoon period. The updated plan will be helpful to strengthen the institutional mechanism of Disaster Management in the district.

The planning and preparedness initiatives taken as per the District Disaster Management Plan will be delivered at the disaster-prone areas in order to reduce the vulnerability and minimise the loss in case a disaster strike.

Sri Deben Kumar Pradhan, OAS (SAG)

Additional District Magistrate-cum-
CEO, District Disaster Management
Authority, Koraput

FOREWORD

Koraput district is situated in the southern part of the state and is famous for its natural bounties, enriched with tribal tradition and culture. The habitants of this district depend upon the natural resources, agriculture and daily wage labourers to maintain their livelihoods. The district is vulnerable to various natural calamities like drought, flood, epidemic, heat stroke, boat capsize, lightning, drowning, fire accident, snakebite etc. All these have been a matter of great concern, which have added to the miseries of the people in this District.

District Disaster Management Plan (DDMP) 2019 is updated to identify threat and developed a defence mechanism to minimise the impact of any disaster in the District. The basic objective of this action plan is to ensure safety of the lives and properties of the people and domestic animals during the disasters. While formulating the District Disaster Management Plan, instructions of Special Relief Commissioner, MD, OSDMA, United Nations Development Programme (UNDP) and also valuable suggestions of Members of the District Natural Calamity Committee have been taken into consideration. The plan document has been categorized into two parts i.e. Volume-1 contains DDMP and Volume-2 contains all relevant statistical figures of the district, Maps &resource data base. The Plan deals with Risk Assessment and Vulnerability Analysis, Identification of Disaster-Prone Areas, Response Structures, Inventory of Resources, Standard Operating Procedures and Directory of Institutions & Key Individuals, etc. The Plan is prepared to help the District Administration to evacuate and protect the vulnerable people immediately at the time of any calamity strikes.

Meticulous planning is the first step to successful implementation. It is our sincere belief that with this District Disaster Management Plan 2019, disasters can be tackled in a more systematic & scientific approach providing relief to the affected persons through timely action in Koraput District.

1.28: Migration:

(at least one member of the household migrating outside the district/ state for a period of more than 4 months in search of work during the year)

I. Trend and duration of Migration:

As pr available information received through complaint cases and filed reports from inspectors during enquiry, the migration happens in certain pockets of the district where marginal farmers & landless labourers opt to move out of the state in search of better source of earning. It has been seen that migration season mostly commences from month of August/ September after showing of seeds as well as due to rain, the employment opportunity reduces. In certain areas migration begins after harvesting of crop i.e. in the month of December. The duration of migration ranges from four months to eight months. Most of the migrant workers work in Brik kiln, Construction Projects, Plantation Work, Bore well Vehicle etc as manual/unskilled labourers. Mass migration with wife/family as seen in Western Odisha is not prevalent in Koraput. However, there have been cases of migration happening out of allurement of better pay and life by middlemen/agents in the district.

II. Destinations of Migration:

Most of the migrant workers move to Andhra Pradesh, telengana, Karnatak, tamilandu & Kerala to work as manual/unskilled jobs.

Figure 24 Government of India Notification on Items and Norms assistance from the SDRF and NDRF

No. 32-7/2014-NDM-I
Government of India
Ministry of Home Affairs
(Disaster Management Division)

'C' Wing, 3rd Floor, NDCC- II,
Jai Singh Road, New Delhi-110001,
Dated the 8th April 2015

To

1. Chief Secretaries of all States
2. The Relief Commissioners / Secretaries, Department of Disaster Management of all States

Subject: - Items and Norms of assistance from the State Disaster Response Fund (SDRF) and the National Disaster Response Fund (NDRF) for the period 2015 -- 2020.

Sir/ Madam,

I am directed to state that based on consideration of the recommendations of Fourteenth Finance Commission (FFC) on financing of expenditure on immediate relief during natural disasters for the period 2015--2020 and the report of the Expert Group set up by this Ministry, the Government of India has revised the items and norms for assistance from SDRF/ NDRF. The approved list of items and norms for assistance from SDRF / NDRF in the wake of identified natural disasters is **Annexed**. The revised norms will be effective from 1st April 2015. However, the farmers affected by hailstorms in different parts of the country during February/ March 2015 will also be given assistance under the new norms.

2. The revised items and norms can also be downloaded from website of Disaster Management Division of Ministry of Home Affairs i.e. *www.ndmindia.nic.in*.

3. As the first charge on SDRF should be on a disaster of severe nature, there has been a requirement to adjust balance amount of SDRF whenever NDRF amount is released. This procedure stands revised as follows:-

50% of SDRF balance, as on 31st March of the preceding financial year, will be adjusted while releasing the assistance from NDRF for the first disaster in a financial year. In case the same State faces another severe disaster during the same year, no adjustment will be made while releasing NDRF assistance.

4. A copy of the communication alongwith their enclosure is also being sent to the Accountants Generals of the States for necessary action.

5. This supersedes this Ministry's earlier letters on this subject, the last being No.32-3/2013-NDM-I dated the 28th November, 2013 and No. 32-3/2013 NDM-I dated 5th March 2014.

Yours faithfully,

(Goutam Ghosh)
Deputy Secretary to the Govt. of India
