Chapter – 1: Introduction

Under the DM Act 2005, it is mandatory on the part of District Disaster Management Authority (DDMA) to adopt a continuous and integrated process of planning, organizing, coordinating and implementing measures which are necessary and expedient for prevention as well as mitigation of disasters. These processes are to be incorporated in the developmental plans of the different departments and preparedness to meet the disaster and relief, rescue and rehabilitation thereafter, so as to minimize the loss to be suffered by the communities and are to be documented so that it is handy and accessible to the general public.

Section 31 of Disaster Management Act 2005 (DM Act) makes it mandatory to have a disaster management plan for every district. DDMP shall include Hazard Vulnerability Capacity and Risk Assessment (HVCRA), prevention, mitigation, preparedness measures, response plan and procedures.

1.1 Aims and Objectives of the DDMP:

Aims -

i. To identify the areas vulnerable to major types of the hazards in the Sambalpur district.
ii. To adopt proactive measures at Sambalpur district level by all the govt. departments to prevent disaster and mitigate its effects.
iii. To define and assign the different tasks and responsibilities to stakeholders during the pre-disaster and post-disaster phases of the disaster.
iv. To enhance disaster resilience of the people in the Sambalpur district by way of capacity building.
v. Reduce the loss of public and private property, especially critical facilities and infrastructure, through proper planning.
vi. Manage future development to mitigate the effect of natural hazards in the Sambalpur district.
viii. To develop the standardized mechanism to respond to disaster situation to manage the disaster efficiently.
x. To prepare a response plan based upon the guidelines issued in the State Disaster Management Plan so as to provide prompt relief, rescue and search support in the disaster affected areas.
xi. To adopt disaster resilient construction mechanism in the district by way of using Information, Education and Communication for making the community aware of the need of disaster resilient future development.
xii. To make the use of media in disaster management.
xiii. Rehabilitation plan of the affected people and reconstruction measures to be taken by different govt. departments at district level and local authority.

The District Disaster Management Plan (DDMP) for Sambalpur is the guide for achieving the objective i.e. mitigation, preparedness, response and recovery. This Plan needs to be prepared to respond to disasters with sense of urgency in a planned way to minimize human, property and environmental loss.

1.2 Preparation and Approval of DDMP:

As defined in Section 30 of DM Act 2005, DDMA shall act as the district planning; coordinating and implementing body for disaster management and take all measures for the purpose of disaster

management in the district in accordance with the guidelines laid down by the National Authority and the State Authority.

The district Collector will discuss the modalities and seek views for preparation of a holistic plan in the meeting of the DDMA held in the month of January and to prepare the plan by the end of February every year.

After finalisation the District Authority shall send a copy of the District DM plan to the State Disaster Management Authority for approval. The District Disaster Management Plan should be reviewed and updated annually.

1.3 Evolution of DDMP in brief: Evolution, Procedure and Methodology to be followed for preparation of DDMP

The Disaster Management Plans is the compilation of Block Disaster Management Plans and it evolves through a bottom up approach of preparing disaster management plan at village, GP and block level. The plan clearly indicates the role and responsibilities of each player of the team. The Collector at district level, Sub-Collectors at Sub divisional level and BDOs at the Block level head the team. The Sarpanch is the key player in GP level and the Community with guidance of Village Disaster Management Committee formulates and carries out this plan at village level. Civil Society Organisations also play a vital role during the implementation of this plan in the field. This year the DDMA meeting was held in the Collectorate on 26th March 2019 and all the members gave their valuable inputs and suggestions for the preparation of DDMP 2019.All the concerned line departments were asked to co-operate the District administration for DDMP preparation.

Formation of team (s) - These teams are constituted under Collector and members of DDMA from the Public Information departments and other line departments, village level / block level / Tehsil / Sub division which will be operating in coordination to each other and disseminating information to the DEOC where the district Information teams headed by District Emergency Officer who will process these information and take necessary action for the preparation of District Disaster Management Plan.

Plan preparation – After the finalization of the District Disaster Management Plan formation by DDMA it is the responsibility of the EOC to write the DDMP as prescribed format with in the stipulated time.

It is the duty of every citizen to assist the District Collector or such other person entrusted with or engaged in disaster management whenever demanded generally for the purpose of disaster management.

1.5 Plan for review and updating: Periodicity

Planning teams should establish a process for reviewing and revising the plan. Reviews should be a recurring activity. Review on an annual basis is considered minimum. It should be mandatory to consider reviewing and updating the plan after the following events:

(i) A major incident happened in the district.
(ii) A change in operational resources (e.g., policy, personnel, organizational structures, Management processes, facilities, equipment).
(iii) A formal time to time update of planning guidance or standards.
(iv) Major exercises conducted during the year in the district.
(iv) A change in the district's demographics or hazard or threat profile.
(v) The enactment of new or amended laws or ordinances.

The responsibility for the coordination of the development and revision of the basic plan, annexes, appendices and implementing instructions must be assigned to the appropriate person(s).

It is recommended that a DDMP be internally reviewed on a yearly basis and either be updated or reaffirmed. The updates or reaffirmed document may also be used to summarize the accomplishments of the past year and help the administration to prioritize mitigation goals for the next year.

2.4 Geography:

Geologically, Sambalpur forms a part of Central Indian Craton, which has been stabilized since 2500 m.y. Most of the areas are covered by metamorphic rocks of Achaean age succeeded by sedimentary rocks of Proterozoic and Gondwana.Metamorphic rocks of Achaean age belong to Dharwarian group. The rock types include schists, gneisses, porphyritic granite, younger granite (grey & pink coloured), quartzite, banded iron formation (BIF), charnockites, khondalites and intrusives like amphibolites, basic/ultrabasic rocks, nepheline syenite, pegmatites and quartz veins. The Kolhan group (equivalent to Dhanjori group) comprising meta sedimentary rocks underlain by granite gneiss and BIF. The regional trend of the litho units is NNE-SSW to NE-SW. Sambalpur town is situated on the quartzite and quartz schist exposures having trend ENE-WSW belonging to Proterozoic age. The nepheline-syenite outcrops are marked around Redhakhol.The Archaean rocks are overlain by proterozoic sediments such as quartzite/sandstone and shale. These rocks are exposed on SW rim of Hirakud reservoir, which forms eastern margin of the Chhatisgarh basin. The proterozoics are unconformably overlain by Lower Gondwana rocks (Talcher & Damuda group) represented by shale, sandstone and coal seams. The rocks are exposed around Rail and Koing in Redhakhol sub division. A prominent fault known as North Orissa Boundary Fault (NOBF) is running from northwestern border to eastern coast and forms a boundary between north Orissa craton in north and Eastern Ghat Mobile Belt in the south. The other fault is running from Sambalpur to Sonepur in NE – SW direction.

2.5 Topography:

Sambalpur district forms part of the Northwest upland of Orissa, which is rolling and multiplying the ground slopes from a height of 776 ft. to a height of 460 ft. The thick blanket of black cotton soil all over the district has been made somewhat sticky by the yellow earth developing in the undulating topography of the district. Isolated hills rising sharply from the surface are a regular sight.

2.6 River System:

Sambalpur is mainly known of its rivers running throughout the district. Major rivers of Sambalpur district are Mahanadi, Sionath, Mond, Ib, Veden, Hansdeo.

ODRAF aims at reducing casualties, clearance of communication channels, quick deployment of personnel and equipments and minimize expenditure and time lag and support institutional arrangement. In 3 phases, ten units of ODRAF have been set up. The ODRAF units are strategically located throughout Orissa. Locations of these units are identified on the basis of vulnerability profile to cut down the response time for their deployment. The ODRAF Units do not have any geographical /territorial restrictions in terms of area of operation.

10 new units of ODRAF have been proposed to set up at different locations like Sambalur, Boudh, Kalahandi, Nawarangpur, Gajapati, Berhampur, Puri, Khorda, Kendrapada and Jajpur

Chapter – 6 Climate Change Adaptation & Mitigation

6.1 Climate Change Adaptation & Mitigation

Weather and climate are the results of complex interactions between anthropogenic and natural factors. Evidence of global climate change include higher average temperatures, changes in precipitation, ocean warming, ocean acidification, sea level rise, decreasing sea ice, and changes in physical and biological systems. Observed climate change can be linked with the increase of green house gas concentrations in the atmosphere since the industrial revolution. Global surface temperature change for the end of the 21st century is likely to reach 4°C if no drastic mitigation actions are taken. Various sources of climate data exist that can support planning for climate change.

Greenhouse gases (GHGs) are trace gases in the atmosphere that absorb and emit long wave radiation. They naturally blanket the earth and keep it at about 33° C warmer than it would be without these gases in the atmosphere. The table features the seven most important greenhouse gases as regulated under the Kyoto Protocol. The seven gases each have a different capacity to trap heat in the atmosphere, or a so-called "*global warming potential*" (GWP). They all belong to the group of long-lived greenhouse gases (LLGHGs), because they are chemically stable and persist in the atmosphere over time scales of a decade to centuries or longer, so that their emission has a long-term influence on climate. Some of the GHGs occur naturally (e.g. CO_2, CH_4 and N_2O) but increases in their atmospheric concentrations over the last 250 years are due largely to human activities. Other greenhouse gases are entirely the result of human activities (e.g. HFCs, PFCs, SF_6 and NF_3).

Table No : 6-1

Greenhouse Gas	Global Warming Potential (GWP) (over 100 years)	% of Total Anthropogenic GHG Emissions (2010)
Carbon dioxide (CO_2)	1	76%
Methane (CH_4)	25	16%
Nitrous oxide (N_2O)	298	6%
Hydrofluorocarbons (HFCs)	124-14,800	< 2%
Perfluorocarbons (PFCs)	7,390-12,200	< 2%
Sulphur hexafluoride (SF_6)	22,800	< 2%
Nitrogen trifluoride (NF_3)	17,200	< 2%

6.2 Important Greenhouse Gases: Carbon Dioxide (Co_2)

Most important greenhouse gas (contributes ~64% to total radiative forcing by long-lived GHGs). Half of CO_2 emitted by human activities is being absorbed in the biosphere and in the oceans. Rest remains in the atmosphere for hundreds to thousands of years

The most important anthropogenic GHG is carbon dioxide (CO_2). It accounts for around 64% of total radiative forcing due to LLGHGs. Carbon dioxide does not have a specific lifetime because it is continuously cycled between the atmosphere, oceans and land biosphere and its net removal from the atmosphere involves a range of processes with different time scales. CO_2 is primarily emitted as a result of burning of fossil fuels, deforestation and forest degradation and iron and steel production. Oceans and forests are the main sequesters of carbon i.e. sinks that can absorb CO_2 from the atmosphere. Carbon dioxide is the gas to which all other gases are compared when speaking of Global Warming Potential. Emissions of other greenhouse gases can be converted into *CO_2 equivalent emissions*.

Table No: 6-2

6.	M/s Shyam metalics & Energy Limited	Pondloi	Coal Comsumption-4,764 Tons/Day			

6.3 Important Greenhouse Gases: Methane (CH4)

Second most significant greenhouse gas (contributes ~18% to total radiative forcing by long-lived GHGs). Approximately 40% of methane is emitted into the atmosphere by natural sources. About 60% comes from human activities & Stays in the atmosphere for approximately 12 years.

The second most significant anthropogenic GHG is methane (CH_4) which contributes to approximately 18% of total radiative forcing due to LLGHGs. Approximately 40% of methane is emitted into the atmosphere by natural sources (e.g. wetlands and termites). About 60% comes from human activities (e.g. cattle breeding, rice agriculture, fossil fuel exploitation, landfills and biomass burning). Methane is mostly removed from the atmosphere by chemical reactions, persisting for about 12 years. Thus although methane is an important greenhouse gas, its effect is relatively short-lived.

6.4 Important Greenhouse Gases: Nitrous Oxide(N_2O)

The third most significant greenhouse gas (contributes ~6% to total radiative forcing by long-lived GHGs). Stays in the atmosphere for approximately 114 years. Nitrous oxide is emitted into the atmosphere from both natural (about 60%) and anthropogenic sources (approximately 40%).

Nitrous oxide is the third most significant GHG, contributing to about 6% of radiative forcing due to LLGHGs. The primary human sources of N_20 are fertilizer production and use in agriculture and various industrial processes. It is estimated that N_20 stays in the atmosphere for an estimated 114 years. Its impact on climate, over a 100-year period, is 298 times greater than equal emissions of carbon dioxide. It also plays an important role in the destruction of the stratospheric ozone layer which protects us from the harmful ultraviolet rays of the sun.

Table No: 6-4

Sl No	Name of the Block	Fertiliser /Industrial processes	Annual Usage (In tonnes)	Ranking as per N2O Emission (PPM)	Other major polluants emited (PPM)	Action taken for cutting down émission

6.5 Important Greenhouse Gases: Fluorinated Gases

Global warming effect up to 23,000 times greater than carbon dioxide. Stay in the atmosphere up to 50,000 years. Three main groups: hydrofluorocarbons (HFCs), perfluorocarbons (PFCs), and sulfur hexafluoride (SF_6). Mainly developed as substitutes for ozone-depleting substances

Fluorinated gases are a family of man-made gases used in a range of industrial applications. Sources include refrigerants, air-conditioning, solvents, aluminium and magnesium production, etc. Many fluorinated gases have very high global warming potentials (GWPs) relative to other greenhouse gases. That means small atmospheric concentrations can have large effects on global temperatures. They can also have long atmospheric lifetimes, in some cases, lasting thousands of years. Fluorinated gases are removed from the atmosphere only when they are destroyed by sunlight in the far upper atmosphere. In general, fluorinated gases are the most potent and longest lasting type of greenhouse gases emitted by human activities. There are three main categories of fluorinated gases: hydrofluorocarbons (HFCs), perfluorocarbons (PFCs), and sulfur hexafluoride (SF_6).

- Hydrofluorocarbons (HFCs) are the most common group of *F-gases*. They are used in various sectors and applications, such as refrigerants in refrigeration, air-conditioning and heat pump equipment; as blowing agents for foams; as solvents; and in fire extinguishers and aerosol sprays.
- Perfluorocarbons (PFCs) are typically used in the electronics sector (for example for plasma cleaning of silicon wafers) as well as in the cosmetic and pharmaceutical industry. In the past PFCs were also used in fire extinguishers and can still be found in older fire protection systems.
- Sulphur hexafluoride (SF_6) is used mainly as an insulating gas, in high voltage switchgear and in the production of magnesium and aluminium.

2.	M/S Hirakud Smelter	Hirakud	216 Tons/Annum		

6.6 Important Green House Gases: chlorofluorocarbons (CFCs)

Chlorofluorocarbons (CFCs) an important Green House Gas contribute about 12% to radiative forcing by long-lived GHGs has not been included in the Kyoto Protocol because they are already regulated under the Montreal Protocol on Substances that Deplete the Ozone Layer which entered into force in 1989. The Montreal Protocol includes, for example, chlorofluorocarbons (CFCs) which contribute about 12% to total radiative forcing by LLGHGs. CFCs can stay in the atmosphere for more than 1,000 years. CFCs have a global warming potential (GWP) that ranges between 4,750 and 14,400 (over 100 years time span). CFCs are used in the manufacture of aerosol sprays, blowing agents for foams and packing materials, as solvents, and as refrigerants.

Table No: 6-6

Sl No	Name of the Industry/Firm/Plant	location	Annual émission (In PPM)	Ranking as per flourinated gas Emission (PPM)	Action taken for cutting down émission

6.7 Green House Gas Sequestration

In order to prevent dangerous anthropogenic interference with the climate system, actions need to be taken to stabilize greenhouse gas concentrations in the atmosphere. Such actions are referred to as "climate change mitigation". More specifically, climate Change mitigation involves:

- reducing GHG emissions, e.g. by making older equipment more energy efficient;
- preventing new GHG emissions to be released in the atmosphere, e.g. by avoiding the construction of new emission-intensive factories;
- preserving and enhancing sinks and reservoirs of GHGs, e.g. by protecting natural carbon sinks like forests and oceans, or creating new sinks ("carbon sequestration").

Table No: 6-7 Major Greenhouse Gases Contributors (Anthrpogenic) to Climate Change

Greenhouse Gas	Human Source (Examples)	% of Total Global GHG Emissions (2010)
Carbon dioxide (CO_2)	Fossil fuel combustion, land use changes, cement production, etc	76%
Methane (CH_4)	Fossil fuel mining/distribution, livestock, rice agriculture, landfills, etc	16%
Nitrous oxide (N_2O)	Agriculture (fertilisers) and associated land use change, etc	6%
Hydrofluorocarbons (e.g. HFCs)	Liquid coolants, etc	< 2%
Perfluorocarbons (e.g. PFCs)	Refrigerant, electronics industry and aluminium industry, etc	< 2%
Sulphur hexafluoride (SF_6)	Insulator in electronics and magnesium industry, etc	< 2%
Nitrogen trifluoride (NF_3)	Electronics and photovoltaic industries, etc	< 2%

The global community has committed itself to hold warming below 2°C (compared to pre-industrial temperatures) to prevent dangerous climate change. The 2013 IPCC report on the physical science basis of climate change provides a "budget approach" to this goal, looking at total allowable CO_2 emissions level to meet the 2°C target. The report states that in order to have a greater than two in three chance of keeping *global warming* below 2°C, cumulative emissions of CO_2 cannot exceed 1,000 Gigatonnes of carbon (GtC). As of 2011, more than half this amount, or over 500 GtC, has already been emitted since 1861-1880. When the effects of other greenhouse gases are included, even less CO_2 could be emitted to keep below a 2°C warming.

Current annual emission levels are at 9.5 GtC and are likely to grow every year due to population growth and economic development patterns. If annual emissions continue to grow as in past years ("business as usual" scenario) the carbon budget will be exhausted in the next three decades.

1	Energy	• Use of renewable heat and power (hydropower, solar, wind, geothermal and bio-energy) • Improved supply and distribution efficiency • Carbon capture storage (CCS) • Combined heat and power
2	Transport	• More fuel efficient vehicles • Use of alternative energy sources (biofuels, cleaner diesel, etc.) • Better land-use and transport planning • Shift from individual transport to public transport systems • More efficient driving practices • Non-motorized transport (cycling, walking)
3	Industry	• Process-specific technologies that improve efficiency and reduce emissions • Material recycling and substitution • Heat and power recovery/cogeneration • Control of greenhouse gas emissions
4	Agriculture	• Manure and livestock management to reduce CH_4 emissions • Improved fertilizer application techniques to reduce N_2O emissions • Improved crop and grazing land management to increase soil carbon storage • Restoration of cultivated peaty soils and degraded lands

		• Agro-forestry practices
5	Forestry	• Reduced deforestation • Afforestation/reforestation • Forest management • Tree species improvement to increase biomass productivity and carbon sequestration
6	Waste	• Landfill methane recovery • Waste incineration with energy recovery • Composting of organic waste • Controlled wastewater treatment • Recycling and waste minimization • Biocovers and biofilters to optimize CH_4 oxidation

Safety of Schools and Child Care Institutions

Implementation of School Safety Policy Guidelines 2016 *(SSP-2016 Guidelines)*

7.1 Order on WP(C) 483/2004 of Hon'ble Supreme Court

The Hon'ble Supreme Court vide orders of dated 14.08.2017 in WP (C) 483/2004, directs vide letter no 2437/2004/SC/PIL/(WRIT) dt. 23.08.2017 that the School Safety Policy (SSP) 2016 guidelines issued by NDMA are statutory in nature and shall be implemented in letter and spirit by all concerned authorities for all schools. The direction of the Supreme Court in Implementation of the School Safety Policy Guidelines Inter-alia postulates as follow:

- Time bound implementation of the Guidelines
- District Disaster Management Authority to ensure and monitor compliance of the said Guidelines
- District Education Officer of each District to be a "Nodal officer" with responsibility, liability and obligation as well as powers and functions to ensure strict compliance with the Guidelines within the district of his jurisdiction.
- Joint Monitoring Committee consisting of representations of both Department of School Education & Literacy, Ministry of HRD and NDMA
- Quarterly compliance reports from the Chief Secretary to MHRD and NDMA on the actions taken.

Hon'ble Supreme Court has also defined few actions at different levels to ensure school safety

Table No: 7-1

State & District Level	**School Level:**
• Policy for safety audits in all schools • 'Stability certificate' by Government-certified engineer. • Manual for fire safety procedures and other safety precautions • The National Building Code of India, 2005, to construct fire-safe buildings. (Revised 2016)	• Schools must take appropriate safety measures and an emergency response plan that delineates staff responsibilities, communication modes, and training and updating procedures for all members of the faculty, staff and students. • Fire insurance coverage should be made mandatory for all schools. • Ensuring that the kitchen in the precincts of the school has adequate safety mechanisms.

7.2 Guidelines on School Safety Policy, 2016- NDMA

The School Safety encompasses "The creation of safe environments for children starting from their homes to their schools and back." This as well includes safety from large-scale natural hazards, human made risks, pandemics, violence as well as more frequent and smaller-scale fires, transportation and other related emergencies and environmental threats that can adversely affect the lives of children.

Vision :

- The Guidelines stand for a vision of India where all children and their teachers, and other stakeholders in the school community are safe from any kind of preventable risks that may threaten their well being during the pursuit of education.
- Educational continuity is maintained/ resumed even in the immediate aftermath of a disaster so that Children are physically, mentally and emotionally secure within their schools.

Approach and Objectives

- All hazard approach.
- All schools; all stakeholders 2. Strengthening existing policy provisions to make schools safer
- School Safety as an indicator of quality for continued planning, execution and monitoring
- Primary objective is to ensure the creation of safe learning environment for children.
- Also seek to highlight specific actions towards school safety that can be undertaken by different stakeholders within the existing framework of delivery of education.

Applicability

- The National School Safety Policy Guidelines apply to all schools in the country- whether government, aided or private, irrespective of their location in rural or urban areas.
- They apply to all stakeholders involved in delivery of education to Children in India

All hazard approach

- School Safety efforts needs to take cognizance of all kinds of hazards that may affect the wellbeing of children.
- Hazards include structural and non-structural factors.
- Structural factors include dilapidated buildings, poorly designed structures, faulty construction, poorly maintained infrastructure, loose building elements, etc.
- Non Structural factors include loosely placed heavy objects such as almirahs, infestation of the campus by snakes and any other pests, broken or no boundary walls, uneven flooring, blocked evacuation routes, poorly designed and placed furniture that may cause accidents and injury, inadequate sanitation facilities, etc.

Right to Education Act 2009

- The Act sets minimum norms and standards with regard to location and quality of schools and in Clause 19, lays down that no school shall be established, or recognized unless it fulfills the norms and standards specified in the schedule.
- One of the key standards is in relation to access to “all weather buildings”; in “areas with difficult terrain, risk of landslides, floods, lack of roads and in general, danger for young children in the approach…
- the State Government / Local Authority shall locate the school in such a manner as to avoid such dangers”.
- The Act lays down the formation of the School Management Committee for planning of infrastructure and other requirements with respect to operational functioning of schools.
- The School Development Plan, as laid out by the Act, spells out the physical requirements of additional infrastructure and equipments to meet the norms spelt out in the schedule (in relation to all weather buildings).

Key Action Areas

1. **Institutional strengthening at the State & District levels**
   - Co-opting senior officials of the Department of Education in SDMA and DDMA.

- Nomination of School Safety Focal Point Teacher & Sensitization of School Management Committee on DM.

2. **Planning for Safety**
   - Structural Measures (including siting, design and detailing for structural safety).
   - Non structural Measures.
   - Preparation & implementation of School Disaster Management Plan.
   - Leveraging existing flagship programmes to make school campus safer.
3. **Capacity building for safe schools**
   - Training for students and school staff
   - Specialized training and skill building of Education officers, representatives of SCERT and DIET, SDMA, DDMA, etc on school safety
   - Mock Drills
4. **Disaster Management in Core Curriculum**
5. **Regular monitoring of risk and revision of School Safety Plans (including Safety Audits & Availability of Emergency Equipment).**

Chapter – 8 : Capacity Building Measures

8.1 Approach

Developing a DDMP without building capacity or raising awareness amongst stake- holders can be detrimental to the development of a successful and sustainable plan. Stakeholders and communities are critical components to a successful, long-term, sustainable disaster management plan. Capacity Building develops and strengthens skills, competencies and abilities of both Government and non–government officials and communities to achieve their desired results during and after disasters, as well as preventing hazardous events from becoming disasters

Developing institutional capacity is very important. At the same time, by making the local community part of the process and solution would help in ensuring that disaster mitigation measures are more likely to be implemented and maintained over time.

8.2 Capacity Building of Govt. Officials, PRI Members etc.:

Table No: 8-1

Sl. No.	Activity-cum-Training	Participants	Duration	Remarks
1	Orientation training programme on disaster management & Heat Wave preparedness.	All BDOs, Tahasildars, Head of line departments, Police & Fire Dept. etc.	½ day	To be coincided with the first quarter meeting of the DDMA
2	Training on road safety and transportation preparedness during summer time 2019.	NH, RTO employees, Bus and other transport management members.	1 day	Review the safety plan in transportation and new emerging technologies to increase the safety of road transportation and to increase the do and don't s that placed in Heat Wave plan for passengers who are travelling in summer.
3	Rain fall data recording	Head Clerks of all Blocks.	1 day	Training by professionals for better rain fall data recording and additional trainings for automatic weather stations.
4	Public health in emergencies- safe drinking water and sanitation	All BDOs, Block and district level officials of PHED/ RWS & S Dept.	1 day	Training to maintain the hygienic conditions and better flood preparedness.
5	Trainings Role and responsibilities of FSMMC.	Members of concern FSMMC.	4 days	Training to enhance the responsibilities and functions of FSMMCs.
6	Trainings on First Aid on Flood Shelters.	Sarapanch & FSMMC members.	4 days	Training to be done with the help of district Red Cross.
7	Workshop on Role of Media in Disaster Management	Media Personal.	½ day	The training will be conducted with the help of DIPRO for better media management

				during any disaster.
8	Training on implementation of guidelines on minimum standard of relief.	All BDOs, Tahasildars & RIs.	9 days	Training will help concern authorities to review the revised guidelines and operations.
9	Training on Drought management	All Thasils.	9 days	To be conducted jointly with related departments like Agriculture, Horticulture etc. for more effective result.
10	Earth quake resistant construction.	Asst. Engineers & JEs of all infrastructure development departments.	1 day	Training is to be done by technically sound specialist to demonstrate the new evolving technologies for earthquake resilience structure.
12	Training on GIS mapping of Utilities.	Block Computer Programmers, Line Department MIS officials.	1 day	GIS experts to be trained to concern participants for better automatic weather station management.
13	Capacity building FAMEX programme.	Principal/ Head Masters of all Govt. & Private Institutions.		To be conducted by ODRAF unit in Upper primary and High Schools.
14	Boat safety training.	Boat members and concern Block and ULB members dealing with.	4 days	Training to be done in Maneswar, Dhankaouda, boat plying under SMC jurisdiction and Hirakud reservoir area.
15	Decision Support System	All line department OICs and Concern computer operatoers	15 Days	Training to be done at each office level with hands on practice.

8.2.1 Tabletop Exercise:

Collector to organize a tabletop exercise involving all district and block level key officials in each year in the 1st week of April, to assess the emergency response plans for various disasters.

8.2.2 District/ Block level Mock Drills:

Table No.8-2

Sl. No	Type of Mock Drill	Officials/ Institutions to be involved	Month/ Date

2	Fire Accident	Fire Service, School. Colleges, ODRAF	March
3	Public Gathering	Police, Fire,ODRAF,NDRF	May/June
4	Flood	ODRAF	May

8.3 Disaster management Education (School Safety and School Disaster Preparedness):

All educational Institutions (Both Govt. and Private) which are functioning in the districts may include organizing awareness generation programmes in schools and colleges and conducting basic mock drills for fire and other disasters. For this purpose DDMP 2019 proposed the following programme under Disaster management Education (School Safety and School Disaster Preparedness).

Table No.8-3

Sl. No.	Name of the Programme	No. of Schools, Colleges and Other Educational institutions to be covered during the year	Time Line	Remarks

2	Preparation of School disaster management plan	1 private schools @ district level, 9 private schools @ Block level, 1 Govt. High schools @ district level, 9 Govt. High schools @ Block level,	July-September	The schools are to be taken as model school for School Disaster Management Plan.
3	District level Quiz/ painting/ debate competitions	Based on the nomination received from the BEOs/DEO	September	To create disaster preparedness among students.

8.4 Community Capacity Building and Community Based Disaster Management:

The district has identified 1238 inhabited villages including 150 inaccessible pockets. During 2019-20, VDMC will be constituted and strengthen in 100 villages. Nature of capacity building programme will be prioritised depending the type and intensity of disaster. Villages with multi-hazard vulnerability towards drought, flood, heat waves, and fire incidents will be selected in the first phase on phase manner. Utmost care will be given to include persons having prior experience as a member of the VDMC. Blocks wise numbers of villages and members to be covered under 2019-20 is as follows.

Chapter – 10 : Response

Response

Response refers to activities done for handling disaster to bring the situation to normalcy not exceeding fifteen days from the abatement of disaster. The onset of an emergency creates the need for time sensitive actions to save life and property, reduce hardships and suffering, and restore essential life support and community systems, to mitigate further damage or loss and provide the foundation for subsequent recovery. Effective response planning requires realistic identification of likely response functions, assignment of specific tasks to individual response agencies, identification of equipment, supplies and personnel required by the response agencies for performing the assigned tasks. A response plan essentially outlines the strategy and resources needed for search and rescue, evacuation, etc

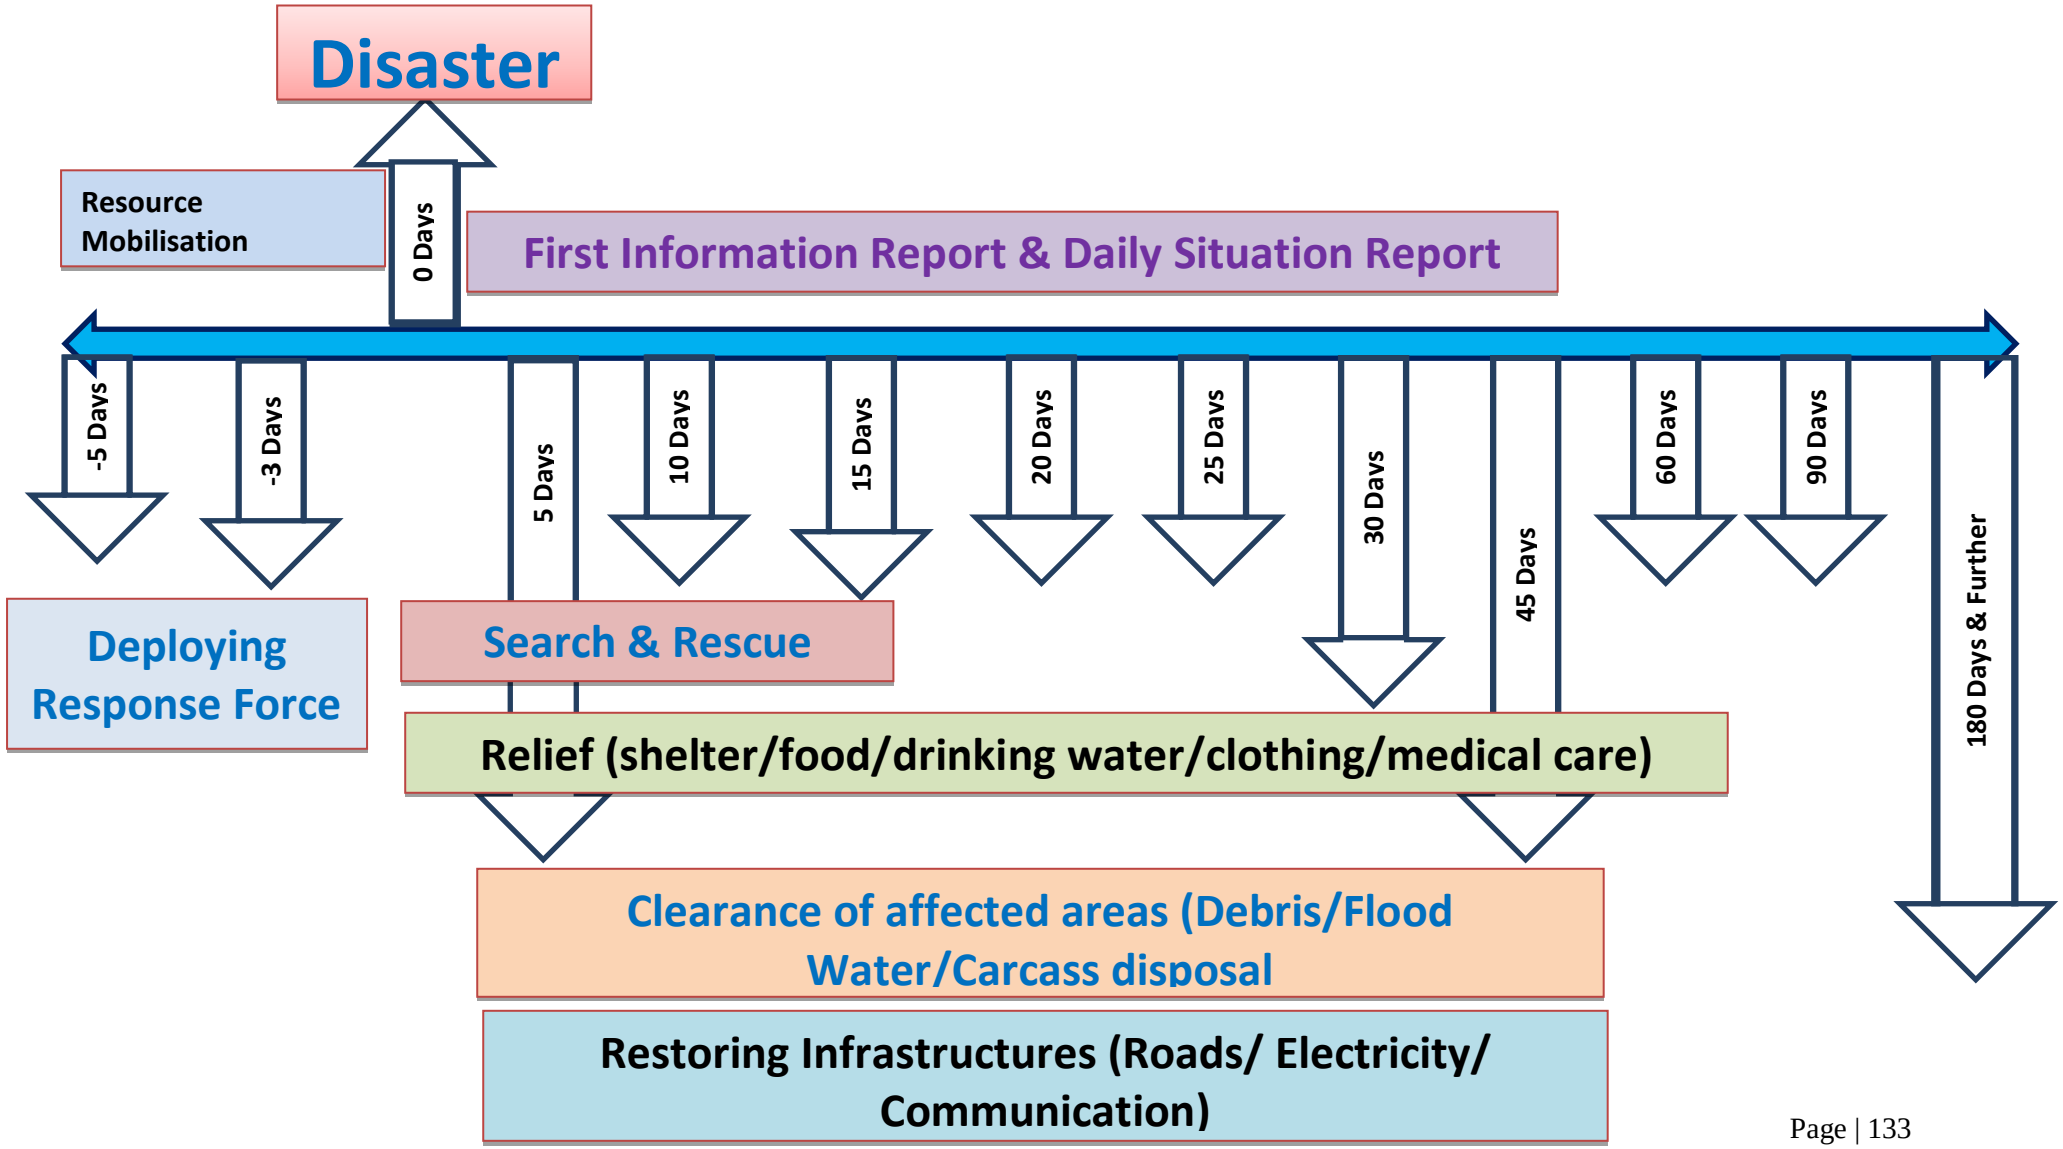

10.1 Phases of Response : Timeline (Indicative)

Chapter-12 : Recovery

A series of long term activities framed to improve upon the repaired activities in the Reconstruction & rehabilitation phase are covered under Recovery phase. Recovery includes all aspects of mitigation and also incorporates the continuation of the enabling process, which assists the affected persons and their families not only to overcome their losses, but also to achieve a proper and effective way to continue various functions of their lives. The Recovery process is therefore a long-terms process in which everyone has a role – the Government including the PRI members, NGOs and especially the affected people, their families and the community.

- Preparation of Recovery plan for displaced population, vulnerable groups, environment, livelihoods
- Organise initial and subsequent technical assessments of disaster affected areas and determine the extent of recovery works necessitated in addition to reconstruction & rehabilitation works.
- Evaluate the extent of works under SDRF/NDRF & other sources(damaged infrastructures)
- Explore opportunities for external aids like (International Agencies / Civil Society / Corporate Sector)
- Allocate funds for the stabilisation of the repaired & reconstructed infrastructure.
- Integrate Climate change & Disaster Risk Reduction features in the recovery programmes

The DM & Collector will be the co-ordinator of all Recovery activities in the District. The role of the DM & Collector will be to:

- Generally monitor the management of the recovery process;
- Ensure implementation of the recovery plan by line departments, blocks
- Effective service delivery minimising overlap and duplication.

Chapter- 13 :Financial Arrangement

13.1 National Disaster Response Fund (NDRF)

The National Disaster Response Fund (NDRF) has been constituted by the Government of India as per the sub-sections (1) of section (46) of Disaster Management Act, 2005 and recommendation of the 13th Finance Commission. NDRF has been constituted by replacing the National Calamity Contingency Fund (NCCF).It is administered by the National Executive Committee (NEC).

In the event of a calamity of a severe nature when the State Disaster Response Fund (SDRF) is insufficient to meet the relief requirements, additional central assistance is provided from NDRF, after following the laid down procedure. The State Government is required to submit a memorandum indicating the sector-wise damage and requirement of funds. On receipt of memorandum from the State,

- An Inter-Ministerial Central Team is constituted and deputed for an on the spot assessment of damage and requirement of funds for relief operations, as per the extant items ad norms.
- The report of the Central Team is considered by the Inter-Ministerial Group (IMG) / A Sub-committee NEC constituted under section 8 of DM act, 2005, headed by the Home Secretary.
- Thereafter, the High Level Committee (HLC) comprising of the Finance Minister, the Agriculture Minister, the Home Minister and the Deputy Chairman, Niti Ayog considers the request of the State Government based on the report of the Central Team recommendation of the IMG thereon, extant norms of assistance and approves the quantum of assistance form NDRF.
- This is, however, subject to the adjustment of 75% of the balance available in the State's SDRF for the instant Calamity.

(Please refer page no.___of Volume-II for NDRF Items and Norms)

13.2 State Disaster Response Fund (SDRF)

As per the provisions of Disaster Management Act, 2005 sub-section (1)(a) of Section (48) and based on the recommendation of the 13th Finance Commission, the Government of Odisha has constituted the State Disaster Response Fund (SDRF) replacing the Calamity Relief Fund (CRF). The amount of corpus of the SDRF determined by the 13th Finance Commission for each year the Finance Commission period 2010-15 has been approved by the Central Government. The Central Government contributes 75% of the said fund. The balance 25% matching share of contribution is given by the State Government. The share of the Central Government in SDRF is released to the State in 2 installments in June and December respectively in each financial year. Likewise, the State Government transfers its contribution of 25% to the SDRF in two installments in June and December of the same year. Ministry of Home Affairs, upon being satisfied that exigencies of a particular calamity so warrant, may recommend an earlier release of the Central share up to 25% of the funds

due to the State in the following year. This release will be adjusted against the installments of the subsequent year.

As per the Guidelines on Constitution and Administration of the State Disaster Response Fund (SDRF) laid down by the Ministry of Home Affairs, Government of India, the SDRF shall be used only for meeting the expenditure for providing immediate relief to the victims of cyclone, drought, earthquake, fire, flood, tsunami, hailstorm, landslide, avalanche, cloud burst and pest attack. The State Executive Committee (SEC) headed by the Chief Secretary SEC decides on all matters connected with the financing of the relief expenditure of immediate nature from SDRF.

(Please refer page no.___of Volume-II for SDRF Items and Norms)

13.3 Chief Minister Relief Fund (CMRF)

Chief Minister's Relief Fund aims to provide assistance to calamities and in distress condition, to indigent persons suffering from critical ailments and to undertake charitable activities for public welfare.

13.3.1.3 Persons affected by calamities or violence: Assistance for relief & rehabilitation of persons affected by natural or man-made calamities, communal violence', naxal violence or public disorder of a serious nature or any other calamity' affecting a family or a community, which deserves extreme compassion and not covered under any existing assistance scheme of State/central Government.

13.3.1.4 Assistance for Rural Development: Financial assistance out of CMRF may also be considered to undertake, promote, aid or otherwise support rural development including any programme for promoting the social and economic welfare of the public in any rural area either directly or through an independent agency following due procedure.

To assist more number of deserving person and for better utilisation of the Chief Minister's Relief Fund, the State Government have delegated powers to the Collectors for sanction of assistance out of CMRF so as to extend such assistance to the deserving persons immediately at the time of their need.

13.4 Release of Funds to Departments and Districts:

Funds required towards pure relief to affected persons / families for natural calamities in shape of emergency assistance, organizing relief camp / free kitchen / cattle camp, agriculture input subsidy and other assistances to affected farmers, ex-gratia as assistance for death cases, grievous injury, house building assistance, assistance to fisherman / fish seed farmers / sericulture farmers, assistance for repair / restoration of dwelling houses damaged due to natural calamities are administered through the respective collectors.

Part funds towards repair / restoration of immediate nature of the damaged public infrastructure are released to the Departments concerned. On receipt of requisition from the Collectors / Departments concerned, funds are released after obtaining approval / sanction of S.E.C. However, funds towards pure relief are released under orders of Special Relief Commissioner / Chief Secretary and the same is placed before the State Executive Committee in its next meeting for approval. To save time, Collectors have been instructed to disburse the ex-gratia assistance from the available cash and record the same on receipt of fund from Special Relief Commissioner.

13.5 Damage Assessments and Report after Flood/Cyclone

Private properties and properties of Government under different Departments are damaged by high floods and cyclones. As per para-75 of Orissa Relief Code, the Collector shall undertake assessment of damages to private properties as well as properties of Government. This assessment shall be done quickly soon after the abatement of flood in the prescribed formats prescribed in Appendix- X of Orissa Relief Code.

13.5.1 Submission of preliminary damage report (Para-76 of ORC)

1. The Collector as well as the district level officers under each Department of Government shall immediately after assessment of flood damage forward a copy of their report to their immediate Head of Department. The district level officers may also supply reports to the Collector.

2. The Heads of Departments after necessary scrutiny shall forward their reports to their respective Departments of Government with copy to Special Relief Commissioner, not later than two weeks from the date of abatement of flood.

3. The Special Relief Commissioner shall compile the State report and shall furnish the consolidated preliminary report to the Revenue Department within a week of the receipt of the reports from the Heads of Department.

4. The preliminary flood damage report should be prepared as accurately as possible, as the relief measures, if any, are to be based on the merit and statistical data of that report.

13.5.2 Submission of final flood damage report (Para-77 of ORC)

The concerned Heads of Departments as well as the Collector shall take immediate steps to compile the final report on flood/cyclone damage in the formats prescribed in Appendix- X soon after submission of the preliminary report.

Accidental errors, clerical mistakes, shortcomings, if any, noticed should be rectified in the final report. The final report shall be made available to Special Relief Commissioner as soon as possible and not later than one month from the date of abatement of flood.

On receipt of the reports from the different sources, Special Relief Commissioner shall forthwith compile the State report and furnish the same to the Revenue Department.

13.6 Central and State Government programmes and Schemes on Natural Calamities

Mainstreaming Disaster Management in development planning is the most critical component to mitigate disaster risks. That's why it's important to make note of financial resources which are used in the implementation of such programmes and schemes which can lessen the risk from disasters by reducing vulnerability. It is also crucial to build communities resilience to deal with them. Moreover, as mandated by Ministry of Finance & Ministry of Home Affairs on 01st and 03rd June, 2014 respectively, 10 % flexi-fund within the centrally sponsored schemes (CSS) to be utilised, inter alia for mitigation / restoration activities in the event of natural calamities in the sector covered by CSS. Thus, relevant Central Government and State Government funded schemes are identified which are crucial to build over resilience of communities in the context of the district.

Flood in July 2018 , preparedness, Response and Management at Sambalpur Urban area.

On 21st July 2018 at around 3.00 PM a dangerous thunderstorm warning message received from SRC office, The warning was so particular that specially three district and particular areas were marked under the RED colour to visualize the impact of the upcoming rainfall amount which is to be above the expectation or like cloud burst. As soon as the massage was received, the same was circulated to authorities of the district in District Emergency What's app group and also over telephone and it was also disseminated to other concern individuals, like nodal officers of the temporary relief shelters, NGO, respondent team etc. in the Flood Management What's app group created by District Administration. Within a very short span of time the alertness messages were disseminated to all for their information and quick action in their respective areas.

.The preparedness measures to face such situation was taken seriously in Sambalpur, regular meeting in district level and shelter level were held, which was followed by District level Committee on Natural Calamity Meeting held in the month of May 2018.As decided in the meeting of District level Committee on Natural Calamity each temporary relief shelter was tagged with a nodal officer nominated by district administration, supporting staffs, NGOs, local clubs and other important person of the respective area, ASA , Angenwadi and health worker to encounter any worse situation. Nodal officers were instructed to visit the shelters regularly, conduct meetings and to submit the details of the shelters along with the problems lies there like drinking water, sanitary facilities, electricity etc. so that the administration would eradicate the problems with the help from concern departments. Around 34 temporary relief shelters were identified across Sambalpur urban area. Out of which three are multipurpose flood shelters built by OSDMA.

On 21st July 2018 around 5 PM the reports of water logging was came in notice and the normal life of public in the urban area was little disturbed due to heavy rainfall. Collector Sambalpur immediately called a meeting of the emerging emergency situation in order to chalk out the plan to encounter the possible flood kind of situation.Commissioner Sambalpur Municipal Corporation came to emergency section collectorate to execute the preliminary work for possible flood in urban area of Sambalpur. All the diesel mobile pump sets were taken out from the store to various area for dewatering. Subsequently Collector Sambalpur came to emergency section conference hall and started the operation from there. He called all concern departments heads for movements to various areas and some mechanical equipments like JCBs, cutter etc. to clean the roads, drains and blockages.All nodal officers were instructed to be in their respective relief shelter and report the situation of the area along with the shelter people accommodation numbers time to time to the emergency section. Due to excess rainfall the electricity supply was stopped and whole area was in dark with heavy to heavy rain fall. The condition was very adverse still district administration was dealing with all these problems very effectively. It was came in notice that some area like Khetrajpur, Modipada, Housing Board Colony,

Nuapada, N. Guha Lane, Sakhipada, Cheruapada are in vulnerable condition. Immediate movement was made to respective area by the first respondent fire team and teams formed by Sub Collector Sambalpur, Tahasildar Sadar Sambalpur, SDA Sambalpur, Commissioner Sambalpur Municipal Corporation to calculate the intensity of the flood. People from that area were evacuated to respective nearby relief shelter. ODRAF teams from Jharsuguda and Bolangir were deployed to rescue people. Around 300 people were rescued by ODRAF team. Dry food arrangement like Chuda, Gur, Biscuits was made by CSO sambalpur and distributed by the team to various relief shelters by 10.30 PM. Candles and match box also provided to shelters. In order to dewatering the whole town water two pumping station are created at Balibandha and Binakhandi each having 8 and 10 numbers of pumps of capacity of 150 HP each respectively.By 10.30 when the pumps were submerged due to excessive rainfall 4 numbers of each pump stated to repel the water from town area to Mahanadi directly, this helped a lot to control the situation of waterlogged in Sambalpur urban area affected by rainfall.13 mobile pumpsets were installed at various places across the town for dewatering by Sambalpur Municipal Coprporation with the help of fire presonnels.All possible actions were taken through emergency section headed by Collector Sambalpur.Contineous coordination and communication with all relief shelters , affected area, flood management teams, communities was seen which results a good management during the flood time.Around 10 PM it was came in notice of the administration that a village under Dhankauda Block Name Bhoitikra was marooned due to heavy rainfall and cut off from the mainstream due to the excess river water which passing near by the village.As sson as it came in knowledge district administration reacted in that matter quickly and send an ODRAF and fire team to the spot for rescue operation. Around 300 people were rescued successfully and all are shifted to the Babubandh school, where all the relief facilities were provided to them in a priority manner.Around 3.00 AM a whole visit of the town area was done by District Emergency Officer and District Project Officer, OSDMA to evaluated the situation and future course of action.Out of 34 relief shelters identified in urban area according to the flood situation demand around 26 are functioned during this flood period.

Government of India Notification on Items and Norms assistance from the SDRF and NDRF

No. 32-7/2014-NDM-I
Government of India
Ministry of Home Affairs
(Disaster Management Division)

'C' Wing, 3rd Floor, NDCC- II,
Jai Singh Road, New Delhi-110001,
Dated the 8th April 2015

To

1. Chief Secretaries of all States
2. The Relief Commissioners / Secretaries, Department of Disaster Management of all States

Subject: - Items and Norms of assistance from the State Disaster Response Fund (SDRF) and the National Disaster Response Fund (NDRF) for the period 2015 -- 2020.

Sir/ Madam,

I am directed to state that based on consideration of the recommendations of Fourteenth Finance Commission (FFC) on financing of expenditure on immediate relief during natural disasters for the period 2015--2020 and the report of the Expert Group set up by this Ministry, the Government of India has revised the items and norms for assistance from SDRF/ NDRF. The approved list of items and norms for assistance from SDRF / NDRF in the wake of identified natural disasters is **Annexed**. The revised norms will be effective from 1st April 2015. However, the farmers affected by hailstorms in different parts of the country during February/ March 2015 will also be given assistance under the new norms.

2. The revised items and norms can also be downloaded from website of Disaster Management Division of Ministry of Home Affairs i.e. *www.ndmindia.nic.in*.

3. As the first charge on SDRF should be on a disaster of severe nature, there has been a requirement to adjust balance amount of SDRF whenever NDRF amount is released. This procedure stands revised as follows:-

50% of SDRF balance, as on 31st March of the preceding financial year, will be adjusted while releasing the assistance from NDRF for the first disaster in a financial year. In case the same State faces another severe disaster during the same year, no adjustment will be made while releasing NDRF assistance.

4. A copy of the communication alongwith their enclosure is also being sent to the Accountants Generals of the States for necessary action.

5. This supersedes this Ministry's earlier letters on this subject, the last being No.32-3/ 2013-NDM-I dated the 28th November, 2013 and No. 32-3/2013 NDM-1 dated 5th March 2014.

Yours faithfully,

(Goutam Ghosh)
Deputy Secretary to the Govt. of India

10. STANDING OPERATING PROCEDURES of NDMA

1. INTRODUCTION:-

DISASTER "A catastrophe, mishap, calamity or grave occurrence in any area, arising from natural or man-made causes, or by accident or negligence which results in substantial loss of life or human suffering or damage to, and destruction of property, or damage to, and degradation of, environment, and is of such a nature or magnitude as to be beyond the coping capacity of the community of the affected area" India has traditionally been vulnerable to natural disasters on account of its unique geo-climatic conditions and it has, of late, like all other countries in the world, become equally vulnerable to various man-made disasters. The periodicity and intensity of disasters have increased manifold in the last few decades. In many disasters, human and economic losses could have been minimized by taking preventive, mitigation and preparedness measures. Anti-national elements find terrorism easy to adopt and cost-effective. A terrorist attack involving Nuclear, Biological and Chemical agents differs from a normal terrorist attack as it results in specific effects on health and can cause fatal injuries, creates panic, affects the morale of the community, and lowers its faith in the government. The important ingredients of an effective response system are integrated institutional arrangements, state of the art forecasting and early warning systems, failsafe communication system, rapid evacuation of threatened communities, quick deployment of specialized response forces and coordination and synergy among various agencies at various levels in dealing with any disaster. Most importantly, all the agencies and their functionaries must clearly understand their roles and responsibilities and the specific actions they have to take for responding to disaster or disaster threatening situations. This sop lays down, in a comprehensive manner, the specific actions required to be taken by ndrf bns for responding to natural and man made disaster of any magnitude and any dimension.

2. TYPES OF DISASTER WHERE NDRF WILL RESPOND

(i) Major Natural Disasters:-
a) Earthquakes
b) Floods
c) Cyclones
d) Landslides
e) Tsunamis
f) Avalanches
(ii) Man Made Disasters:-
a) Chemical disasters.
b) Biological disasters.
c) Radiological and Nuclear events
d) Train Accidents

e) Building Collapsed events
(iii) Any other disaster, for which the State/District authorities make a specific requisition with the exception of fire accidents.
Bridges

3. ROLE OF NDRF

1) Provide specialised response for rescue and relief in case of disasters-natural and manmade.
2) Deployment in case of impending disasters.
3) Assistance to civil authorities in distribution of relief material during/after disaster.
4) Co- ordination with other agencies engaged in rescue/relief work

4.NDRF TASKS

1) Deployment in case of impending disaster.
2) Provide specialist response in case of disasters which covers
a) NBC Disaster (Decontamination of the area and personnel).
b) Removal of debris.
c) Extrication of victims-live or dead.
d) First medical response to victims.
e) To extend moral support to victims.
f) Assistance to civil authorities in distribution of relief material.
3) Co-ordination with sister agencies.

5. AIM OF THE SOP

To provide, in a concise and convenient form, a list of major executive actions involved in responding to natural and manmade disasters and the necessary measures for preparedness, response and relief required to be taken. To achieve maximum result in minimum time for any force, a well defined Operating Procedure is required to be framed. This procedure is called the Standard Operating Procedure (SOP). The SOP is made keeping in view the role and the objectives of the force. In the case of NDRF, the force has to respond within the minimum time frame to reach the place of disaster with the designated required equipment. The SOP has been prepared keeping in mind the motto of NDRF, i.e. "**AAPADA SEWA SADAIV"**.

6. REQUISITION FOR RESPONSE OF THE NDRF DURING PRE-DISASTER PHASE

State Government may request for pre-positioning of the Unit/Sub-units of the NDRF as a measure of pro-active response to deal with the impending disaster when there are plausible reasons to believe that gravity of the disaster will be unmanageable for the State Government. Contact numbers and place of deployment of NDRF units are given at Appendix-"A"

7. REQUISITION FOR RESPONSE OF THE NDRF DURING DISASTER PHASE State Government or the concerned District Magistrate may request for the specialized disaster response of the Team (s) or Coy (s) of the NDRF to deal with the disaster when it is of Level-III. i.e. when the gravity of the disaster is so severe that it becomes unmanageable for the State Government to deal with even after having made proper use of SDRF.

8. REQUISITIONING AUTHORITY

The following State Government Authorities can seek requisition for NDRF teams alongwith complete details of the disaster which takes place in their area of responsibility :-

- Principal Secretaries of the States dealing with Disaster Management
- Relief Commissioners of the States
- Collectors/DCs /DMs of the districts

Maximum available details which would be required to provide rescue and relief should be passed on to the identified NDRF Battalion, as per requisition form attached at Appendix - A.

9.AUTHORITY TO ACCEPT REQUISITION

NDRF Teams can be requisitioned for natural as well as manmade disasters. This requisition can be sent to the following:-

- MHA
- NDMA
- HEAD QUARTER DG NDRF
- NDRF BATTALIONs.

MHA & NDMA in turn will direct HQ DG NDRF for deployment of NDRF personal which will be done accordingly after consultation with respective Commandant and same will be intimated to MHA & NDMA. In case the requisition is placed directly to NDRF Battalions due to emergent nature of situation, the Commandants will deploy NDRF personnel immediately and intimate the same to HQ DG NDRF/ MHA / NDMA.

10. DECISION OF DEPLOYMENT

As per the provision of DM act 2005, the District Disaster Management Authorities chaired by District Magistrate/Deputy Commissioner/District Collector of a District shall be responsible for overall supervision and monitoring of Disaster Management in the district. The District Authorities will give the detailed information about any disaster to the respective NDRF unit. The Unit Commandant, after getting detailed information from the District Authorities, will consult Head Quarter NDRF and decide the quantum of deployment for the said 5 disaster i.e how many teams to be deployed for the subject operation. Head Quarter NDRF will intimate the subject deployment to MHA DM (Div) and NDMA through the fastest mode of communication available. This will be followed by written communication also. The team which will move for

rescue work will be self contained and carry tentage, medicines ready-made food for 72 hrs, ration, and utensils for them.

11.MOBILISATION PHASE

Battalion Commandant in consultation with the State authority will decide mode of conveyance of the teams to be deployed for the said emergency response. Firstly one advance party will rush for the disaster site followed by the main body in their own transportation. If air lifting is to be done the requisition will go to air authority through the state authority. The state authority will arrange accommodation, if possible and transportation at disaster site. The state will be responsible for providing security backup to the teams during deployment.

12.OPERATIONAL PHASE

It is important to mention here that NDRF is not tasked with the maintenance of law and order in a disaster zone area. Furthermore, the safety and security of the victim and personnel involved in the search, rescue and relief operation including the NDRF personnel shall also be the responsibility of state/local authorities.

13. DE-MOBILISATION PHASE

This phase describes the actions required to be taken when company/teams have been instructed that disaster management operations are to be ceased and withdrawal has to be commenced by Company Commander/Team Commander in consultation with the nodal officer and after getting clearance from HQ DG NDRF. The exit strategy will be executed as per the initial plan of action. All coy Commanders/team Commanders must try and ensure a handover note specifying what is being handed over and to whom to ensure proper preparedness and a smooth transition. A detailed report should be prepared by the Battalion after the operation is over and file for record with HQs NDRF. This report should make a clear mention of immediate steps to be taken to fill the gaps or seek any improvement in the existing system. Following actions are to be ensured:-

1. Mode of transportation will be decided for de-induction in consultation with the state Authority. The State authorities 6 shall be responsible for providing the transport to the NDRF teams to return to their units.
2. Clearance from local authorities.
3. EOC, along with the ADM base, shall be the last to demobilize from the disaster site.

14. POST DISASTER PHASE

It is a phase for critical analysis of the entire rescue operation carried by the Bn. The joint appraisal report of the performance shall also be prepared by the Battalion Commandant and State authority after de-induction of the rescue teams. After this, the shortcomings of the rescue operation and the lessons learnt will also be drawn. The post disaster phase will also include:

a) Submission of the post-disaster report.

b) Conducting of a lesson-learnt review to improve the overall effectiveness and efficiency for response to future disaster.

c) Repair and maintenance of equipments

d) Condemnation of equipments.

e) Medical checkups of all members of operational groups.

f) Treatment for injured troops during rescue operations.

g) Accounting for rescue material used and not used.

h) Accounting for rescue material lost/not retrieved.

i) Drawing case study of entire disaster rescue operation.

j) Post psychometric treatment i.e. men must be sent to meet their family members.

CONCLUSION This SOP is a guideline for successful response in any kind of disaster. It should be followed in letter and spirit. It is only then that NDRF will prove its worth in an effective manner and be seen as an elite force in the field of disaster management.
